Vacuum Insulation, Fundamentals and Applications

EDITORIAL

Vacuum Insulation, Fundamentals and Applications	<i>H. Okubo</i>	531
--	-----------------	-----

PAPERS

Effect of Contact Surface on Non-Sustained Disruptive Discharge Phenomena after Current Interruption in Vacuum	<i>H. Tanaka and S. Yanabu</i>	532-537
Effect of Electrode Surface Roughness on Breakdown Conditioning under Non-uniform Electric Field in Vacuum	<i>K. Kato, Y. Fukuoka, H. Saitoh, M. Sakaki and H. Okubo</i>	538-543
On the Variety of Triggering Mechanisms of High-voltage Breakdown in Vacuum	<i>A. V. Batrakov, S. A. Onischenko, D. I. Proskovskiy and D. J. Johnson</i>	544-552
Partial Vacuum Breakdown Characteristics of Helium at 20 kHz for Inhomogeneous Field Gap	<i>K. Koppisetty, H. Kirkici and D. L. Schweickart</i>	553-559
Gas Discharge Caused by Triboelectricity Around a Contact During Friction Between Insulators	<i>T. Miura and I. Arakawa</i>	560-565
Field Enhancement at a Triple Junction in Arrangements Consisting of Three Media	<i>T. Takuma and T. Kawamoto</i>	566-571
Correlation Between Voltage Holding Capability and Light Emission in a 500 keV Electrostatic Accelerator Utilized for Fusion Application	<i>M. Hanada, Y. Ikeda, M. Kamada, K. Kikuchi, M. Komata, K. Mogaki, N. Umeda, K. Usui, L. R. Grisham and S. Kobayashi</i>	572-576
Breakdown Conditioning Characteristics of Long Gap Electrodes in a Vacuum	<i>T. Fukuoka, T. Yasuoka, K. Kato and H. Okubo</i>	577-582
Secondary Electron Emission from Alumina RF Windows	<i>S. Michizono</i>	583-592
Determination of Gas Pressure in Vacuum Interrupter Based on Partial Discharge	<i>M. Kanarol, S. Ohtsuka, M. Hikita, H. Saitou and M. Sakaki</i>	593-599
Effect of Mechanical Finishes on Secondary Electron Emission of Alumina Ceramics	<i>Suharyanto, Y. Yamano, S. Kobayashi, S. Michizono, Y. Saito and Tumiran</i>	600-605
Depression of Insulator Charging in Vacuum by Partial Mechanical Processing	<i>L. Min-fu, D. Xiong-ying, Z. Ji-yan, F. Xing-ming and S. Hui</i>	606-612
Compact High-voltage Vacuum Circuit Breaker, a Feasibility Study	<i>O. Yamamoto, S. Markon and H. Morii</i>	613-619
Effect of Mechanical Finishes on Secondary Electron Emission of Alumina Ceramics	<i>H. Schellekens and G. Gaudart</i>	620-626
Surface Charges on Alumina in Vacuum with Varying Surface Roughness and Electric Field Distribution	<i>Suharyanto, Y. Yamano, S. Kobayashi, S. Michizono, Y. Saito and Tumiran</i>	627-633
Experimental Investigation of Surface Flashover in Vacuum using Nanosecond Pulses	<i>T. Hosono, K. Kato, A. Morita and H. Okubo</i>	634-642
Contact Behavior in Vacuum under Capacitive Switching Duty	<i>P. Yan, T. Shao, J. Wang, W. Gao, W. Yuan, R. Pan, S. Zhang and G. Sun</i>	643-648
A Utility Optimization Method of a High Voltage Vacuum Interrupter Design	<i>F. Körner, M. Lindmayer, M. Kurrat and D. Gentsch</i>	649-652
	<i>Z. Zhizhong, Z. Jiyan, W. Huabin and S. Hui</i>	

DIELECTRIC LETTERS

Effect of Endothermic Reaction Associated with Glass Transition on the Breakdown Strength of Biodegradable Polymer Films	<i>F. Kato, M. Matsushita, S. Omori and Y. Ohki</i>	653-655
--	---	---------

REGULAR PAPERS

Time Evolution of Current through Insulating Paper under DC Voltage Stress	<i>F. Bitam-Megherbi and M. Megherbi</i>	656-662
Biological Effects of Narrow Band Pulsed Electric Fields	<i>S. Katsuki, N. Nomura, H. Koga, H. Akiyama, I. Uchida and S.-I. Abe</i>	663-668
SVM Classification of Contaminating Particles in Liquid Dielectrics Using Higher Order Statistics of Electrical and Acoustic PD Measurements	<i>R. M. Sharkawy, R. S. Mangoubi, T. K. Abdel-Galil, M. M. A. Salama and R. Bartnikas</i>	669-678
Evaluation of Breakdown Characteristics of Oil-immersed Transformers under Non-standard Lightning Impulse-Insulation Characteristics for Non-standard Lightning Impulse Waveforms with Oscillations	<i>S. Okabe</i>	679-688
Thermal Endurance Evaluation of Isotactic Poly(propylene) Based Nanocomposites by Short-term Analytical Methods	<i>A. Saccani, A. Motori, F. Patuelli and G. C. Montanari</i>	689-695
Effects of Gamma-ray Irradiation on Dielectric Surface Breakdown of Polybutylene Polymers	<i>B. X. Du, H. J. Liu and Y. Liu</i>	696-701
Partial Discharge Diagnosis Method Using Electromagnetic Wave Mode Transformation in Gas Insulated Switchgear	<i>S. Okabe, S. Kaneko, M. Yoshimura, H. Muto, C. Nishida and M. Kamei</i>	702-709
Modeling Dynamic Propagation of Characteristic Gases in Power Transformers Oil-Paper Insulation	<i>A. Shahsiah, R. C. Degeneff and J. K. Nelson</i>	710-717
Factors Affecting PD Detection in GIS Using a Carbon Nanotube Gas Sensor	<i>W. Ding, K. Ochi, J. Suehiro, K. Imasaka, R. Hayashi and M. Hara</i>	718-725
A Novel Method to Locate PD in Polymeric Cable Systems Based on Amplitude-frequency (AF) Map	<i>A. Cavallini, G. C. Montanari and F. Puletti</i>	726-734
Bandwidth and Sensitivity Issues in PD Detection in Power Cables	<i>S. Chandrasekar, A. Cavallini, G. C. Montanari and F. Puletti</i>	735-743
PDIV Characteristics of Twisted-Pair of Magnet Wires with Repetitive Impulse Voltage	<i>K. Kimura, S. Ushirono, T. Koyanagi and M. Hikita</i>	744-750
External Impedance and Admittance of Buried Horizontal Wires for Transient Studies Using Transmission Line Analysis	<i>N. Theethayi, R. Thottappillil, M. Paolone, C. A. Nucci and F. Rachidi</i>	751-761

DISCUSSION

Initiation from a Point Anode in a Dielectric Liquid	<i>W. F. Schmidt, M. Kim and R. E. Hebner</i>	762-763
--	---	---------
