

ELECTRIC POWER COMPONENTS and SYSTEMS

Volume 36, Number 1
2008

Contents

- Generator System Reliability Analysis Including Wind Generators Using
Hourly Mean Wind Speed
Ravindra M. Moharil and Prakash S. Kulkarni 1
- A Simplified Recursive Approach to Combined Economic Emission Dispatch
R. Balamurugan and S. Subramanian 17
- An Efficient μ -Analysis Approach to Robust Stability Assessment of Large-Scale
Power Systems
R. Castellanos B. and A. R. Messina 28
- Simple but Reliable Two-Stage GA Based Load Flow
P. Acharjee and S. K. Goswami 47
- Network Reconfiguration for Load Balancing in Radial Distribution Systems
Using Genetic Algorithm
P. V. Prasad, S. Sivanagaraju, and N. Sreenivasulu 63
- Optimal PWM Control of a New Generalized Family of Multilevel Inverters
Tamer H. Abdelhamid and Khaled M. El-Naggar 73
- Fuzzy Satisfying Multiobjective Thermal Power Dispatch Based on Surrogate Worth
Trade-off Method
Lakhwinder Singh and J. S. Dhillon 93
