

ELECTRIC POWER COMPONENTS and SYSTEMS

Volume 36, Number 10
2008

Contents

- Wavelet-based Fault Classification Scheme for a Transmission Line
Using a Support Vector Machine
Bhavesh Bhalja and R. P. Maheshwari 1017
- Dynamic Performance of Microturbine Generation System Connected to a Grid
D. N. Gaonkar, G. N. Pillai, and R. N. Patel 1031
- Output Power Leveling of Wind Farm Using Pitch-angle Control with
Fuzzy Neural Network
**Tomonobu Senjyu, Ryosei Sakamoto, Toshiaki Kaneko, Atsushi Yona, and
Toshihisa Funabashi** 1048
- An Analysis of Let-through I^2t Variations of a Current-limiting Circuit Breaker
by Non-simultaneous Closing in Short-circuit Conditions
D. J. Lee and C. H. Kim 1067
- Static Volt Ampere Reactive Compensator for Self-excited Induction Generator
Feeding Dynamic Load
Yogesh K. Chauhan, Sanjay K. Jain, and Bhim Singh 1080
- Probabilistic Reliability Assessment of Power System Operations
Wenyuan Li and Jiaqi Zhou 1102
- Electrical Power System State Estimation Meter Placement—
A Comparative Survey Report
L. Ramesh, S. P. Choudhury, S. Chowdhury, and P. A. Crossley 1115
- Digital Signal Processor-based Controller Design and Implementation for
Self-excited Induction Generator
D. K. Palwalia and S. P. Singh 1130
