## FEATURES

- 12 The ultimate enzymology: making beer.** Professor Charlie Bamforth discusses the complex enzymology involved in the brewing process
- 15 Boosting spray dryer performance without compromising powder quality.** Maarten Schutyser and colleagues discuss the design of optimal spray drying processes
- 19 Nano- and microtechnology for emulsification.** Chong-Tai Kim and Dr Karin Schroën describe the preparation and uses of nanometre-sized emulsions
- 23 Carbon footprint of British food production.** Jeremy Wiltshire, Gary Tucker and Anke Fendler outline the progress of work to assess greenhouse gas emissions in UK food manufacturing
- 27 Water footprint in food production.** Louise Manning discusses a subject of increasing global concern
- 30 Biotechnologies, bioethics, biofuels, politics and poverty.** Professor Joseph H. Hulse gives a personal overview of the development, practical application and ethical impact of biotechnologies today
- 35 Using enzymes to add value to food and drink products.** Caroline West highlights how enzymes are used in food processing to add value and to benefit product differentiation
- 40 Food grade lubricants.** Sarah Krol and Carmen Grindatti discuss the regulations influencing food grade lubricant formulation
- 46 Accelerating innovation through external partnerships.** Paul Isherwood considers the trend for food and drink companies to engage in open innovation to help meet their strategic needs
- 49 Intellectual property for food science and technology.** In the second of a series of articles, Michael Moore introduces the complex world of IP
- 53 Confectionery's challenge of change.** Paul Sheldrake argues that the confectionery sector can learn from and influence trends in today's rapidly changing world

## REGULARS

- 4 Editorial
- 4 International and Home News
- 8 IFST News
- 58 Products and Services

Articles are welcomed. Notes for Authors are available from the Editor. All submitted material is edited but not refereed. Publication of unsolicited material is not guaranteed.

The Institute of Food Science and Technology Trust Fund accepts no responsibility for statements made by contributors. Mention of commercial products and services in *Food Science & Technology* does not imply endorsement of these products or services by the IFST.

No part of this publication may be reproduced in a retrievable system or transmitted in any form or by any means, electronic, electrostatic, magnetic tape, mechanical, photocopying, recording or otherwise, without permission in writing from the copyright holder.

US Copyright Law application to users in the USA. The Article Fee Code on the first page of an article in this journal indicates the copyright owner's consent that in the USA copies may be made for personal or internal use provided that the state fee, for copying beyond that permitted by Section 107 or 108 of the United States Copyright Law, is paid. The appropriate remittance should be forwarded with a copy of the first page of the article to the Copyright Clearance Center Inc., PO Box 765, Schenectady, NY 12301. If the Code does not appear, copies of the article may be made without charge provided permission is obtained from the Copyright owner. The Copyright owner's consent does not extend to copying for general distribution, for promotion, for creating new works or for resale. Specific written permission must be obtained from the publisher for such copying.
