

Materials Science and Technology

December 2008 Volume 24 Number 12

- 1403 Microstructure and strength modelling of Al–Cu–Mg alloys during non-isothermal treatments**
Part 1 – Controlled heating and cooling
I. N. Khan and M. J. Starink
- 1411 Microstructure and strength modelling of Al–Cu–Mg alloys during non-isothermal treatments**
Part 2 – Welds
I. N. Khan, M. J. Starink, I. Sinclair and S. C. Wang
- 1419 TTP diagrams for 7055 aluminium alloy**
S. D. Liu, X. M. Zhang, J. H. You, Z. B. Huang and Z. P. Zhou
- 1422 Study on microstructures and grain boundary penetration behaviours in contact reactive brazing joints of 6063 Al alloy**
M. F. Wu, C. Yu and J. Pu
- 1427 Prediction of solidification behaviour of weld pool through modelling of heat transfer and fluid flow during gas tungsten arc welding of commercial pure aluminium**
A. Farzadi, S. Serajzadeh and A. H. Kokabi
- 1433 Experimental analysis of corrosion resistance on columnar to equiaxed transition region of as cast structures of Al–Cu alloys**
W. R. Osório, J. E. Spinelli, C. M. Freire and A. Garcia
- 1438 Mg²⁺ content control of aragonite whisker synthesised from calcium hydroxide and carbon dioxide in presence of magnesium chloride**
Z. S. Hu, M.-H. Shao, H. Y. Li, Q. Cai, S. G. Ding, X. P. Wei and Y. L. Deng
- 1444 Modelling and simulation of equiaxed dendritic structures permeability for Pb–Sn alloys**
S. M. H. Mirbagheri and E. Khajeh
- 1452 Initial shear strain development during formation of nanostructured metal chips**
M. J. Jackson, M. D. Whitfield, J. S. Morrell, W. Ahmed and J. P. Davim
- 1462 Calibration of residual stress measurements obtained from EDM hole drilling method using physical material properties**
H. T. Lee and C. Liu
- 1470 Effect of ultrafine grain structure on strain hardening of C–Mn steel warm rolled and submitted to intercritical annealing**
D. B. Santos, E. G. Neves and B. M. Gonzalez
- 1477 Examination of chemical reaction for revealing plastic deformation zone in low carbon steel**
M. Okayasu, A. Sato and M. Mizuno
- 1484 Production of injection molded 316L stainless steels reinforced with (TiC)N particles**
H. Ö. Gülsoy
- 1492 Transient liquid phase bonding of Gamma Met PX: microstructure and mechanical properties**
D. A. Butts and W. F. Gale
- 1501 Development of porous 316L stainless steel with controllable microcellular features using selective laser melting**
Y. F. Shen, D. D. Gu and P. Wu
- 1506 Relationship between failure behaviour and weld fusion zone attributes of austenitic stainless steel resistance spot welds**
P. Marashi, M. Pouranvari, S. M. H. Sanaee, A. Abedi, S. H. Abootalebi and M. Goodarzi
