

Materials Science and Technology

March 2008 Volume 24 Number 3

- 253 **Using matrix methods to characterise the evolution of deformation induced surface roughness in aluminium sheet**
M. R. Stoudt, J. B. Hubbard and S. A. Janet
- 261 **MW plasma polymer thin film synthesis using diglyme precursor**
J. Yang and J. C. Gao
- 266 **Effect of heating rate on re-austenitisation of low carbon niobium microalloyed steel**
D. San Martín, T. de Cock, A. García-Junceda, F. G. Caballero, C. Capdevila and C. García de Andrés
- 273 **Fracture mechanisms of aluminium cast alloy locally reinforced by SiC particles and Al₂O₃ whiskers under monotonic and cyclic load**
MD. Rafiqzaman, Y. Arai and E. Tsuchida
- 281 **Microstructure evolution in hot deformation of 7050 aluminium alloy with coarse elongated grains**
H. E. Hu, L. Zhen, J. Z. Chen, L. Yang and B. Y. Zhang
- 287 **Non-conservation of grain volume during diffusion creep**
B. Burton
- 294 **Neural network modelling of flow stress in Ti-6Al-4V alloy with equiaxed and Widmanstätten microstructures**
N. S. Reddy, C. H. Park, Y. H. Lee and C. S. Lee
- 302 **Robust optimisation of chemical composition of as cast chromium white cast iron using a green sand mould**
A.-H. Cai, H. Chen, W.-K. An, W.-X. Liu, Y. Luo, T.-L. Li, and M. Chen
- 309 **Efficient estimation of thermophysical parameters for LF6 aluminium alloy**
Z. Zeng, L. J. Wang and H. Zhang
- 314 **Effect of boronising on mechanical properties, wear and corrosion of N80 steel**
J. An, X. Tian, Y. Lu, S. J. Sun, Z. G. Wang, W. Q. Hao, X. D. Zhu and Y. L. Yang
- 320 **Microstructural characterisation of as cast and homogenised Mg-Gd-Nd-Zr alloys**
K. Y. Zheng, J. Dong, X. Q. Zeng and W. J. Ding
- 327 **Residual stress relaxation in shot peened high strength low alloy steel**
A. Turnbull, J. J. Pitts and J. D. Lord
- 335 **Designing low carbon, low temperature bainite**
H.-S. Yang and H. K. D. H. Bhadeshia
- 343 **Influence of silicon on cementite precipitation in steels**
E. Kozeschnik and H. K. D. H. Bhadeshia
- 348 **On the effect of nickel substitution in duplex stainless steel**
S. M. Wessman, S. Hertzman, R. Pettersson, R. Lagneborg and M. Liljas
- 356 **Improvement of wear resistance of hot working tool steel by hardfacing Part 2 – Case study**
H. Kashani, A. Amadeh and M. R. Vatanara
- 361 **Synthesis and physicochemical response of polyethylene glycol encapsulated nickel ferrite nanoparticles**
Q. Yuan, S. Rana, R. S. Srivastava, A. Gallo and R. D. K. Misra
- 369 **Numerical identification of material model for C-Mn steel using micro-indentation test**
M. Kopernik, M. Szychalski, K. J. Kurzydowski and M. Pietrzyk
- 376 **Short communication Microstructure and properties of AlTiNiMn_x high entropy alloys**
C. Li, J. C. Li, M. Zhao, L. Zhang and Q. Jiang
