Martensitic transformations

Guest editors: Philip J Withers and Tsutomu Mori

- 883 **Editorial**
- 884 **Crystallography and morphology of twins in equiatomic TiPt martensite**
M. Nishida, M. Matsuda, Y. Yasumoto, S. Yano, Y. Yamabe-Mitarai and T. Hara
- 890 **Giant magnetic field induced strain in ferromagnetic shape memory alloys and its condition**
T. Fukuda and T. Kakeshita
- 896 **Ductile Cu-Al-Mn based shape memory alloys: general properties and applications**
Y. Sutou, T. Omori, R. Kainuma and K. Ishida
- 902 **Comparison using neutron diffraction of martensitic transformation in Fe-Mn-Si shape memory alloys with and without VN precipitates**
E. C. Oliver, T. Mori, M. R. Daymond and P. J. Withers
- 908 **Innovation in producing crane rail fishplate using Fe-Mn-Si-Cr based shape memory alloy**
T. Maruyama, T. Kurita, S. Kozaki, K. Andou, S. Farjami and H. Kudo
- 913 **Relaxation mechanisms in martensitic NiTi(Cu): internal friction measurements correlated to *in situ* TEM straining**
M. Parlinska-Wojtan, R. Schäublin and R. Gotthardt
- 920 **TEM investigation of intermediate phase transformation and micromodulation in Ni-Mn-Ga ferromagnetic shape memory alloys**
K. Tsuchiya, Y. Todaka and M. Umemoto
- 927 **Domain switching in rhombohedral PZT ceramics under electrical and mechanical loading**
D. A. Hall, T. Mori, P. J. Withers, H. Kungl, M. J. Hoffmann and J. Wright
- 934 **Size effects on martensitic phase transformations in nanocrystalline NiTi shape memory alloys**
T. Waitz, T. Antretter, F. D. Fischer and H. P. Karnthaler
-
- 941 **Effect of cooling rate on solidification microstructures in AISI 304 stainless steel**
J. W. Fu, Y. S. Yang, J. J. Guo and W. H. Tong
- 945 **Effect of microstructure on drop weight tear properties and inverse fracture occurring in hammer impacted region of high toughness X70 pipeline steels**
B. Hwang, S. Y. Shin, S. Lee, N. J. Kim and S. S. Ahn
- 957 **Effects of microstructure and chemical composition on dynamic factor of high strength steels**
J. Qu, W. Dabboussi, J. Nemes and S. Yue
- 964 **Microstructure and mechanical properties of stainless steel under Nd:YAG pulsed laser irradiation**
C. Y. Cui, J. D. Hu, Y. H. Liu and Z. X. Guo
- 969 **Plastic strain due to twinning in austenitic TWIP steels**
B. Qin and H. K. D. H. Bhadeshia
- 974 **Microstructure, composition analysis and formation mechanism of Pb-Sn multilayered film synthesised by thin layer electrochemical deposition**
S.-F. Jia, Y.-F. Tu, R.-B. Wei, S.-Y. Huang, J.-P. Sang and X.-W. Zou
- 981 **Mechanical strength and fracture toughness of high chromium white cast irons**
I. F. Pariente, F. J. Belzunce and C. R. y J. Riba
- 986 **Processing of nanocrystalline copper by mechanochemical reduction of CuO and Cu₂O with graphite**
S. Sheibani, A. Ataie, S. Heshmati-Manesh and G. R. Khayati
- 991 **Wrought magnesium alloys for structural applications**
D. Letzig, J. Swiostek, J. Bohlen, P. A. Beaven and K. U. Kainer
- 997 **Graded Ni-YSZ anode coatings for solid oxide fuel cell prepared by EB-PVD**
B. Meng, Y. Sun, X. D. He and M. W. Li
- 1002 **Influence of ZnO homobuffer layer on n-ZnO/p-Si photodiode**
H. X. Qi, Q. S. Li, B. Zhao, M. M. Zheng, X. S. Li and N. Zhang
- 1005 **Short Communication Stress transfer along reinforced fibres of C_f/Al composite during compaction**
S. Murali and M. Chandrasekaran
