

Water Science and Technology

Volume 57, Number 11

Contents

- 1683 The potential of bio-methane as bio-fuel/bio-energy for reducing greenhouse gas emissions: a qualitative assessment for Europe in a life cycle perspective
Andrea Tilche and Michele Galatola
- 1693 A method for prioritization of areas for pesticides surveillance on surface waters: a study in Minas Gerais, Brazil
C. T. Menezes and L. Heller
- 1699 Modelling the effect of the antimicrobial tylosin on the performance of an anaerobic sequencing batch reactor
T. Shimada, J. L. Zilles, E. Morgenroth and L. Raskin
- 1705 Sterols: a tracer of organic matter in combined sewers
S. Zgheib, M. C. Gromaire, C. Lorgeoux, M. Saad and G. Chebbo
- 1713 Wind effects on retention time in highway ponds
T. R. Bentzen, T. Larsen and M. R. Rasmussen
- 1721 Survival of hydrogen sulfide oxidizing bacteria on corroded concrete surfaces of sewer systems
H. S. Jensen, A. H. Nielsen, T. Hvitved-Jacobsen and J. Vollertsen
- 1727 Design of best management practice applications for diffuse phosphorus pollution using interactive GIS
A. S. Kovacs, M. Honti and A. Clement
- 1735 Anaerobic digestion of gelatinous water at laboratory and pilot scale and nitrogen inhibition
D. Martinez-Sosa, Y. Rafrafi, M. Torrijos, N. Bernet, G. Buitron, F. Bosque and J. P. Delgenès
- 1743 Hydraulic performance of sewer pipes with deposited sediments
Robert Banasiak
- 1749 Guiding BMP adoption to improve water quality in various estuarine ecosystems in Western Australia
N. Keipert, D. Weaver, R. Summers, M. Clarke and S. Neville
- 1757 Effect of the type of ion exchange membrane on performance, ion transport, and pH in biocatalyzed electrolysis of wastewater
R. A. Rozendal, T. H. J. A. Sleutels, H. V. M. Hamelers and C. J. N. Buisman
- 1763 Assessment of velocity fields through open-channel flows with an empiric law
J. B. Bardiaux, J. Vazquez and R. Mosé
- 1769 Runoff characteristics of highway pollutants based on a long-term survey through a year
A. Ichiki, F. Ido and T. Minami

- 1777 Problems of operation and main reasons for failure of membranes in tertiary treatment systems
Valentina Lazarova, Silvia Gallego, Verónica García Molina and Philippe Rougé
- 1785 Calculating pH in pig manure taking into account ionic strength
A. M. Nielsen, H. Spanjers and E. I. P. Volcke
- 1791 Sorption and high dynamics of micropollutants in sewers
C. Ort and W. Gujer
- 1799 Consideration of online rainfall measurement and nowcasting for RTC of the combined sewage system
P. Rouault, K. Schroeder, E. Pawlowsky-Reusing and E. Reimer
- 1805 Membrane bioreactors as core technology for water loop closure in a maltery
Heleen De Wever, Wesley Boënné, Michel Danau, N. Vanderspiegel, Kris Lambert, Koen Hardy and Jan Limbos
- 1809 Simulation of the wastewater temperature in sewers with TEMPEST
David J. Dürrenmatt and Oskar Wanner
- 1817 Defining urban diffuse pollution loadings and receiving water hazard
J. B. Ellis and D. M. Revitt
- 1825 Modelling of long-term simultaneous nitrification and denitrification (SNDN) performance of a pilot scale membrane bioreactor
M. Sarioglu, G. Insel, N. Artan and D. Orhon
- 1835 Nonpoint source pollution management for the multipurpose dam watersheds
J.-Y. Choi
- 1843 Long-term eutrophication diagnosis of a high altitude body of water, Zimapán Reservoir, Mexico
L. A. Bravo-Inclán, M. P. Saldaña-Fabela and J. J. Sánchez-Chávez
- 1851 Real-time quantifications of dominant anaerobes in an upflow reactor by polymerase chain reaction using a TaqMan probe
D. W. Liang, T. Zhang and H. H. P. Fang
