

Water Science and Technology

Volume 57, Number 2

Contents

- iii Editorial
- 161 Impact of dissolved oxygen concentration on membrane filtering resistance and soluble organic matter characteristics in membrane bioreactors
Kyung-Nan Min, Sarina J. Ergas and Anna Mermelstein
- 167 Fate of nonylphenol and 17 β -estradiol contained in composted sewage sludge after land application
M. Minamiyama, S. Ochi and Y. Suzuki
- 175 Phosphorus recovery from wastewater through struvite formation in fluidized bed reactors: a sustainable approach
M. I. H. Bhuiyan, D. S. Mavinic and F. A. Koch
- 183 Health risks of micropollutants - the need for a new approach
J. K. Fawell
- 189 Improving the assessment of risk from pathogens in biosolids: fecal coliform regrowth, survival, enumeration, and assessment
S. K. Dentel, Y. Qi and D. S. Herson
- 195 Classification of the degradability of 30 pharmaceuticals in water with ozone, UV and H₂O₂
I. H. Kim, H. Tanaka, T. Iwasaki, T. Takubo, T. Morioka and Y. Kato
- 201 Laboratory pilot scale study for H₂S removal from biogas in an anoxic biotrickling filter
G. Soreanu, M. Béland, P. Falletta, K. Edmonson and P. Seto
- 209 Decentralized collection of iodinated x-ray contrast media in hospitals—results of the feasibility study and the practice test phase
Bernd Heinzmann, Rolf-Jürgen Schwarz, Petra Schuster and Claire Pineau
- 217 Beneficial reuse of precast concrete industry sludge to produce alkaline stabilized biosolids
C. Gowda, R. Seth and N. Biswas
- 225 Reductive dechlorination of 1, 2-dichloroethane using anaerobic sequencing batch reactor (ASBR)
S. K. Gupta and S. C. Mali
- 231 Dewatering and disinfection of aerobic and anaerobic sludge using an electrokinetic (EK) system
J. Huang, M. Elektorowicz and J. A. Oleszkiewicz
- 237 Distribution profiles of endocrine disrupting PAHs/APEOs in river sediments: is there a potential ecotoxicological problem?
Uri Zoller

- 243 The application of waterworks sludge ash to stabilize the volume of cement paste
H. L. Luo, W. T. Kuo and D. F. Lin
- 251 Are we about to upgrade wastewater treatment for removing organic micropollutants?
A. Joss, H. Siegrist and T. A.ernes
- 257 Aeration of anaerobically digested sewage sludge for COD and nitrogen removal: optimization at large-scale
V. Parravicini, K. Svardal, R. Hornek and H. Kroiss
- 265 Modeling microbial diversity in anaerobic digestion
I. Ramirez and J. P. Steyer
- 271 Biogas from waste materials as transportation fuel—benefits from an environmental point of view
P. Börjesson
- 277 Changes of microbial characteristics of retained sludge during low-temperature operation of an EGSB reactor for low-strength wastewater treatment
K. Syutsubo, W. Yoochatchaval, H. Yoshida, K. Nishiyama, M. Okawara, H. Sumino, N. Araki, H. Harada and A. Ohashi
- 283 The performance and microbial diversity of temperature-phased hyperthermophilic and thermophilic anaerobic digestion system fed with organic waste
M. Y. Lee, J. H. Cheon, T. Hidaka and H. Tsuno
- 291 Design and start-up of a high rate anaerobic membrane bioreactor for the treatment of a low pH, high strength, dissolved organic waste water
P. J. Van Zyl, M. C. Wentzel, G. A. Ekama and K. J. Riedel
- 297 The effect of temperature on the performance and stability of thermophilic anaerobic digestion
C. A. Wilson, S. M. Murthy, Y. Fang and J. T. Novak
