

Water Science and Technology

Volume 57, Number 8

Contents

- 1137 High-rate anaerobic wastewater treatment: diversifying from end-of-the-pipe treatment to resource-oriented conversion techniques
Jules B. van Lier
- 1149 On-line titrimetric monitoring of anaerobic–anoxic EBPR processes
M. Vargas, A. Guisasola, J. Lafuente, C. Casas and J. A. Baeza
- 1155 Treatment of low and medium strength sewage in a lab-scale gradual concentric chambers (GCC) reactor
L. Mendoza, M. Carballa, L. Zhang and W. Verstraete
- 1161 The first introduction of reclaimed wastewater to dry-farming field in Okinawa Island, Japan
T. Shigematsu, W. K. C. N. Dayanthi, N. Yamashita, H. Tanaka and T. Yamashita
- 1169 Use of on-line UV/Vis-spectrometry in the measurement of dissolved ozone and AOC concentrations in drinking water treatment
J. van den Broeke, P. S. Ross, A. W. C. van der Helm, E. T. Baars and L. C. Rietveld
- 1177 Anaerobic biodegradation of estrogens—hard to digest
T. Z. D. de Mes, K. Kujawa-Roeleveld, G. Zeeman and G. Lettinga
- 1183 Application of heat shock protein assay and proteome assay to water from wastewater treatment plant
Naoyuki Funamizu, Mikako Takenaka, Junkyu Han and Hiroko Isoda
- 1191 Reuse of low concentrated electronic wastewater using selected microbe immobilised cell system
Seok Jae Lee, Yong-Woo Lee, Jinwook Chung, Jong Kwang Lee, Ju Young Lee, Deokjin Jahng, Yongmi Cha and Yongho Yu
- 1199 Analysis of microbial community structure and diversity in the thermophilic anaerobic digestion of waste activated sludge
T. Kobayashi, Y. Y. Li and H. Harada
- 1207 Anaerobic treatment as a core technology for energy, nutrients and water recovery from source-separated domestic waste(water)
Grietje Zeeman, Katarzyna Kujawa, Titia de Mes, Lucia Hernandez, Marthe de Graaff, Lina Abu-Ghunmi, Adriaan Mels, Brendo Meulman, Hardy Temmink, Cees Buisman, Jules van Lier and Gatze Lettinga
- 1213 Wastewater irrigation of salad crops: further evidence for the evaluation of the WHO guidelines
R. K. X. Bastos, P. D. Bevilacqua, C. A. B. Silva and C. V. Silva

- 1221 Continuous thermal hydrolysis and energy integration in sludge anaerobic digestion plants
F. Fdz-Polanco, R. Velazquez, S. I. Perez-Elvira, C. Casas, D. del Barrio, F. J. Cantero, M. Fdz-Polanco, P. Rodriguez, L. Panizo, J. Serrat and P. Rouge
- 1227 Integrated assessment of urban drainage system under the framework of uncertainty analysis
X. Dong, J. Chen, S. Zeng and D. Zhao
- 1235 Sixty-five-year old final clarifier performance rivals that of modern designs
James L. Barnard, Thomas E. Kunetz and Joseph P. Sobanski
- 1241 Understanding road surface pollutant wash-off and underlying physical processes using simulated rainfall
Prasanna Egodawatta and Ashantha Goonetilleke
- 1247 Analyzing wet weather flow management using state of the art tools
Denny S. Parker, Rion P. Merlo, Jose A. Jimenez and Eric J. Wahlberg
- 1253 Examining the biodegradation of endocrine disrupting bisphenol A and nonylphenol in WWTPs
K. Press-Kristensen, E. Lindblom, J. E. Schmidt and M. Henze
- 1257 A pollutant removal prediction tool for stormwater derived diffuse pollution
D. Michael Revitt, Lian Scholes and J. Bryan Ellis
- 1265 Prediction of alpha factor values for fine pore aeration systems
S. Gillot and A. Héduit
- 1271 Analysis of the causes of pump failure and differences of failure characteristics
H. Korving and E. C. Ottenhoff
- 1277 Pesticides in groundwater and drinking water wells: overview of the situation in the Netherlands
P. N. M. Schipper, M. J. M. Vissers and A. M. A. van der Linden
- 1287 Savings with upgraded performance through improved activated sludge denitrification in the combined activated sludge–biofilter system of the Southpest Wastewater Treatment Plant
A. Jobbágy, G. M. Tardy, Gy. Palkó, A. Benáková, O. Krhutková and J. Wanner
- 1295 Sensitivity analysis of non-point sources in a water quality model applied to a dammed low-flow-reach river
Nayana G. M. Silva and Marcos von Sperling
