

# Water Science and Technology

Volume 58, Number 4

## Contents

- 749 Soluble microbial products formation and their effect on trace metal availability during anaerobic degradation of sulfate laden organics  
**S. K. Patidar and V. Tare**
- 757 *Escherichia coli* in household drinking water and diarrheal disease risk: evidence from Cambodia  
**J. M. Brown, S. Proum and M. D. Sobsey**
- 765 Assessment of the groundwater salinity monitoring network of the Tehran region: application of the discrete entropy theory  
**F. Masoumi and R. Kerachian**
- 773 Faecal bacterial indicators removal in various wastewater treatment plants located in Almendares River watershed (Cuba)  
**Tamara Garcia-Armisen, Josué Prats, Yociel Marrero and Pierre Servais**
- 781 Dissolved oxygen as a key parameter to aerobic granule formation  
**B. S. McSwain Sturm and R. L. Irvine**
- 789 Methane production from ethanol co-products in anaerobic SBRs  
**D. P. Cassidy, P. J. Hirl and E. Belia**
- 795 Theoretical analysis and enhanced nitrogen removal performance of step-feed SBR  
**Jianhua Guo, Yongzhen Peng, Qing Yang, Shuying Wang, Ying Chen and Chenhong Zhao**
- 803 Influence of wastewater composition on biological nutrient removal in UniFed SBR process  
**C. H. Zhao, Y. Z. Peng, S. Y. Wang and X. G. Tang**
- 811 Estimation of sediments in urban drainage areas and relation analysis between sediments and inundation risk using GIS  
**Park Moojong, Jun Hwandon and Shin Minchul**
- 819 Performance evaluation of various aerobic biological systems for the treatment of domestic wastewater at low temperatures  
**N. Sundaresan and L. Philip**
- 831 Upgrading small WWTPs in the autonomous province of Trento (Italy) by alternating oxic/anoxic process: a demonstration study  
**P. Nardelli, G. Gatti, F. Cecchi and E. M. Battistoni**
- 839 Influence of climate change on the water resources in an alpine region  
**S. De Toffol, C. Engelhard and W. Rauch**
- 847 Tertiary treatment of domestic wastewater using zeolite ceramics and aquatic plants  
**Y. Kimochi, T. Masada, Y. Mikami, S. Tsuneda and R. Sudo**

- 853 Evaluation of catalysts and membranes for high yield biohydrogen production via electrohydrogenesis in microbial electrolysis cells (MECs)  
**Shaoan Cheng and Bruce E. Logan**
- 859 Simultaneous removal of N and P in a SBR with production of valuable compounds: application to concentrated wastewaters  
**M. Sperandio, V. Pambrun and E. Paul**
- 865 Switching small WWTPs from extended to intermittent aeration: process behaviour and performances  
**Anna Laura Eusebi, Giacomo Carletti, Emanuela Cola, Francesco Fatone and Paolo Battistoni**
- 873 Effect of pH on Fenton process using estimation of hydroxyl radical with salicylic acid as trapping reagent  
**Chen-Yu Chang, Yung-Hsu Hsieh, Kai-Yuan Cheng, Ling-Ling Hsieh, Ta-Chih Cheng and Kuo-Shan Yao**
- 881 A microbial fuel cell equipped with a biocathode for organic removal and denitrification  
**O. Lefebvre, A. Al-Mamun and H. Y. Ng**
- 887 Improving access to water supply and sanitation in urban India: microfinance for water and sanitation infrastructure development  
**Jenna Davis, Gary White, Said Damodaron and Rich Thorsten**
- 893 Study of the viral removal efficiency in a urban wastewater treatment plant  
**A. Carducci, P. Morici, F. Pizzi, R. Battistini, E. Rovini and M. Verani**
- 899 Microbiological monitoring and automated event sampling at karst springs using LEO-satellites  
**H. Stadler, P. Skritek, R. Sommer, R. L. Mach, W. Zerobin and A. H. Farnleitner**
- 911 Treatment of succinonitrile wastewater by immobilized high efficiency microorganism strains  
**X. F. Zhou, Y. L. Zhang, D. Q. Xu, W. H. Cao, C. M. Dai, Z. M. Qiang, Z. Yang and J. F. Zhao**
- 919 Biological aerated filter treated textile washing wastewater for reuse after ozonation pre-treatment  
**X. J. Wang, S. L. Chen, X. Y. Gu, K. Y. Wang and Y. Z. Qian**
- 925 Performance of a fungal based SBR under pH extreme and shock phenolic exposure  
**A. D'Urso, D. Gapes and M. Bravi**
- 931 Treatment of RO brine—towards sustainable water reclamation practice  
**H. Y. Ng, L. Y. Lee, S. L. Ong, G. Tao, B. Viawanath, K. Kekre, W. Lay and H. Seah**
- 937 Feasibility of disinfection kinetics and minimum inhibitory concentration determination on bacterial cultures using flow cytometry  
**J. H. Cunningham, C. Cunningham, B. Van Aken and L.-S. Lin**
- 945 Simultaneous storage and utilization of polyhydroxyalkanoates and glycogen under aerobic conditions  
**Ozlem Karahan, Derin Orhon and Mark C. M. van Loosdrecht**
- 953 Removal of endocrine disrupter compounds from municipal wastewater by an innovative biological technology  
**L. Balest, G. Mascolo, C. Di Iaconi and A. Lopez**
- 957 Reducing operating costs for struvite formation with a carbon dioxide stripper  
**K. P. Fattah, N. Sabrina, D. S. Mavinic and F. A. Koch**
