

# Water Science and Technology

Volume 58, Number 5

## Contents

- 963 Sustainability assessment of advanced wastewater treatment technologies  
**L. Høiby, J. Clauson-Kaas, H. Wenzel, H. F. Larsen, B. N. Jacobsen and O. Dalgaard**
- 969 Optimized plan of centralized and decentralized wastewater reuse systems for housing development in the urban area of Xi'an, China  
**X. C. Wang, R. Chen, Q. H. Zhang and K. Li**
- 977 Effect of full and partial-bed configuration on carbon removal performance of biological aerated filters  
**Fatihah Suja and Tom Donnelly**
- 985 Life-cycle energy and CO<sub>2</sub> analysis of stormwater treatment devices  
**R. M. Andrew and É.-T. Vesely**
- 995 Evaluation of methods for isolation of DNA for polymerase chain reaction (PCR)-based identification of pathogenic bacteria from pure cultures and water samples  
**K. Horáková, H. Mlejnková and P. Mlejnek**
- 1001 Biological treatment of thin-film transistor liquid crystal display (TFT-LCD) wastewater  
**C. N. Lei, L. M. Whang and H. L. Lin**
- 1007 Theoretical analysis on non-uniformity of water distribution and influence of construction parameters on settling efficiency  
**Ting-Lin Huang, Yu-Xian Li and Hui Zhang**
- 1015 Advanced oxidation processes: mechanistic aspects  
**C. von Sonntag**
- 1023 Characterization of bacterial biofilm communities in tertiary treatment processes for wastewater reclamation and reuse  
**Tadashi Shoji, Shuichi Ochi and Masaaki Ozaki**
- 1031 Advanced H<sub>2</sub>O<sub>2</sub> oxidation for diethyl phthalate degradation in treated effluents: effect of nitrate on oxidation and a pilot-scale AOP operation  
**K. B. Ko, C. G. Park, T. H. Moon, Y. H. Ahn, J. K. Lee, K. H. Ahn, J. H. Park and I. T. Yeom**
- 1039 Hydrological analysis of single and dual storage systems for stormwater harvesting  
**I. M. Brodie**
- 1047 The role of reactive oxygen species in *Staphylococcus aureus* photoinactivation by methylene blue  
**Sonia Sabbahi, Zoubeir Alouini, Meryam Jemli and Abdellatif Boudabbous**

- 1055 Investigation of formaldehyde pollution of tap water and rain water using a novel visual colorimetry  
**K. Murai, M. Okano, H. Kuramitz, N. Hata, T. Kawakami and S. Taguchi**
- 1061 Biosorption of  $Pb^{2+}$  and  $Cd^{2+}$  in a Fixed Bed Column with Immobilised *Chorella* sp. Biomass  
**Veronica Almaguer Cantu, Ma Teresa Garza-González, Javier Rivera de la Rosa and Jose Angel Loredo-Medrano**
- 1071 Pretreatment of wastewater containing a mixture of organic pollutants obtained from a CC2 plant by coagulation  
**Bidhan C. Bag, Makireddi Sai, Mahavir P. Kaushik, Krishnamurthy Sekhar and Chiranjib Bahttacharya**
- 1079 Mechanism studies on chlorine and potassium permanganate degradation of microcystin-LR in water using high-performance liquid chromatography tandem mass spectrometry  
**Ting-Lin Huang, Jian-Wei Zhao and Bei-Bei Chai**
- 1085 Evaluation of performance and microbial ecology of sequencing batch reactor and membrane bioreactor treating thin-film transistor liquid crystal display wastewater  
**Y. J. Wu, L. M. Whang, S. J. Huang, Y. F. Yang, C. N. Lei and S. S. Cheng**
- 1095 Removal of arsenic from groundwater by arsenite-oxidizing bacteria  
**M. Ike, T. Miyazaki, N. Yamamoto, K. Sei and S. Soda**
- 1101 Kinetics of growth and multi substrate degradation by an indigenous mixed microbial culture isolated from a wastewater treatment plant in Guwahati, India  
**Pichiah Saravanan, K. Pakshirajan and P. K. Saha**
- 1107 Application of real-time polymerase chain reaction (PCR) coupled with ethidium monoazide treatment for selective quantification of viable bacteria in aquatic environment  
**D. Inoue, H. Tsutsui, Y. Yamazaki, K. Sei, S. Soda, M. Fujita and M. Ike**
- 1113 Granular biomass capable of partial nitrification and anammox  
**S. E. Vlaeminck, L. F. F. Cloetens, M. Carballa, N. Boon and W. Verstraete**
- 1121 Microbial community of anammox bacteria immobilized in polyethylene glycol gel carrier  
**Y. Date, K. Isaka, T. Sumino, S. Tsuneda and Y. Inamori**
- 1129 Removal of selected pharmaceuticals by chlorination, coagulation–sedimentation and powdered activated carbon treatment  
**D. Simazaki, J. Fujiwara, S. Manabe, M. Matsuda, M. Asami and S. Kunikane**
- 1137 Natural attenuation of chloroethenes: identification of sequential reductive/oxidative biodegradation by microcosm studies  
**K. R. Schmidt and A. Tiehm**
- 1147 Photodegradation of sulphadimethoxine in water by medium pressure UV lamp  
**Y. Lester, I. Gozlan, D. Avisar and H. Mamane**
