

Water Science and Technology

Volume 58, Number 7

Contents

- 1343 Behaviors of physiologically active bacteria in water environment and chlorine disinfection
K. Sawaya, N. Kaneko, K. Fukushi and J. Yaguchi
- 1349 Development of a groundwater biobarrier for the removal of polycyclic aromatic hydrocarbons, BTEX, and heterocyclic hydrocarbons
A. Tiehm, A. Müller, S. Alt, H. Jacob, H. Schad and C. Weingran
- 1357 Artificial wetlands performance: nitrogen removal
Carmen Durán-de-Bazúa, Alejandro Guido-Zárate, Thalía Huanosta, Rosa Martha Padrón-López and Jesús Rodríguez-Monroy
- 1361 Effect of biological pretreatment of coarse MSW on landfill behaviour: laboratory study
R. Bayard, J. de Araujo Morais, M. Rouez, U. Fifi, F. Achour and G. Ducom
- 1371 Effect of solid and liquid retention times on hydrolysis of maize
S. Heaven, C. J. Banks and M. Cornell
- 1379 Rheology as a tool for measurement of sludge shear
Banu Örmeci
- 1385 Quantitative and qualitative characteristics of grey water for reuse requirements and treatment alternatives: the case of Jordan
Lina Abu Ghunmi, Grietje Zeeman, Jules van Lier and Manar Fayyed
- 1397 A decentralized and onsite wastewater management course: bringing together global concerns and practical pedagogy
L. S. Gaulke, J. L. Borgford-Parnell and H. D. Stensel
- 1405 Phosphate removal and sulfate reduction in a denitrification reactor packed with iron and wood as electron donors
Takahiro Yamashita and Ryoko Yamamoto-Ikemoto
- 1415 Hydraulic retention time impact of treated recirculated leachate on the hydrolytic kinetic rate of coffee pulp in an acidogenic reactor
E. Houbron, G. I. González-López, V. Cano-Lozano and E. Rustrían
- 1423 Color and organic compounds removal from secondary effluent of landfill leachate with a novel inorganic polymer coagulant
Y. M. Sang, Q. B. Gu, T. C. Sun and F. S. Li
- 1433 Methanogens in biogas production from renewable resources – a novel molecular population analysis approach
C. Bauer, M. Korthals, A. Gronauer and M. Lebuhn
- 1441 High-rate hydrogenotrophic denitrification in a fluidized-bed biofilm reactor using solid-polymer-electrolyte membrane electrode (SPEME)
M. Komori and Y. Sakakibara

Publishing

- 1447 Anaerobic digestion of residual municipal solid waste using biological–mechanical pre-treatment: the plant of Varennes Jarcy
H. Fruteau de Lacos, E. Thiebaut and C. Saint-Joly
- 1453 The valuation of malnutrition in the mono-digestion of maize silage by anaerobic batch tests
L. Hinken, I. Urban, E. Haun, I. Urban, D. Weichgrebe and K.-H. Rosenwinkel
- 1461 The effect of moisture content and alkalinity on the anaerobic biodegradation of pit latrine sludge
A. A.-L. Couderc, K. Foxon, C. A. Buckley, C. F. Nwaneri, B. F. Bakare, T. Gounden and A. Battimelli
- 1467 Prediction of thermal hydrolysis pretreatment on anaerobic digestion of waste activated sludge
P. Phothilangka, M. A. Schoen, M. Huber, P. Luchetta, T. Winkler and B. Wett
- 1475 A pilot-scale comparison of mesophilic and thermophilic digestion of source segregated domestic food waste
Charles J. Banks, Michael Chesshire and Anne Stringfellow
- 1483 Comparing centralised and decentralised anaerobic digestion of stillage from a large-scale bioethanol plant to animal feed production
B. Drosig, T. Wirthensohn, G. Konrad, D. Hornbachner, C. Resch, F. Wäger, C. Loderer, R. Waltenberger, R. Kirchmayr and R. Braun
- 1491 Use of microaerobic conditions for the improvement of anaerobic digestion of solid wastes
P. Jenicek, F. Keclik, J. Maca and J. Bindzar
- 1497 Biogas from sugar beet press pulp as substitute of fossil fuel in sugar beet factories
L. Brooks, V. Parravicini, K. Svoldal, H. Kroiss and L. Prendl
- 1505 Anaerobic digestion of maize in coupled leach-bed and anaerobic filter reactors
D. Cysneiros, C. J. Banks and S. Heaven
- 1513 Mathematical modelling of disintegration-limited co-digestion of OFMSW and sewage sludge
G. Esposito, L. Frunzo, A. Panico and G. d'Antonio
- 1521 Codigestion of manure and industrial organic waste at centralized biogas plants: process imbalances and limitations
H. B. Nielsen and I. Angelidaki
- 1529 Effects of chemical and enzymatic treatments on the hydrolysis of swine wastewater
Y. H. Lee, Y.-C. Chung and J.-Y. Jung
