

Journal of Hydroinformatics

Official Journal of the IAHR-IWA-IAHS Joint Committee on Hydroinformatics

volume 10 | issue 4 | October 2008

Contents

- 267 Multiobjective contaminant response modeling for water distribution systems security
Ami Preis and Avi Ostfeld
- 275 Attribution of flood risk in urban areas
R. J. Dawson, L. Speight, J. W. Hall, S. Djordjevic, D. Savic and J. Leandro
- 289 TDNN with logical values for hydrologic modeling in a cold and snowy climate
Yonas B. Dibike and Paulin Coulibaly
- 301 Joint application of event-based calibration and dynamic identifiability analysis in rainfall-runoff modelling: implications for model parametrisation
Johannes Cullmann and Gunter Wriedt
- 317 Improving groundwater level forecasting with a feedforward neural network and linearly regressed projected precipitation
Ioannis K. Tsanis, Paulin Coulibaly and Ioannis N. Daliakopoulos
- 331 Neural-network-based simulation-optimization model for water allocation planning at basin scale
M. Shourian, S. Jamshid Mousavi, M. B. Menhaj and E. Jabbari
- 345 Erratum
