

**Contents**

- 291 *Cryptosporidium* surveillance: investigations on the Loch Katrine water supply to Glasgow  
**S. J. Robertson, G. Bell, K. A. Punter and F. Reid**
- 307 The use of polyacrylamides (PAMs) for removing natural organic matter (NOM) from Paraíba do Sul River (Brazil)  
**B. C. Conticelli, C. V. S. Conticelli, E. F. Tôrres and E. B. Azevedo**
- 317 Pipe network system analysis using simulated annealing  
**Hund-Der Yeh and Yu-Chung Lin**
- 329 Effects of hydrophobe contents of amphiphilic polyelectrolytes on flocs size and removal efficiency of NOM from waters  
**R. Alnaizy, M. Sayem Mozumder, B. F. Abu-Sharkh and Sk. A. Ali**
- 337 Optimum rehabilitation strategy of water distribution systems using the HBMO algorithm  
**Omid Bozorg Haddad, Barry J. Adams and Miguel A. Mariño**
- Practical papers**
- 351 Manganese removal and occurrence of manganese oxidizing bacteria in full-scale biofilters  
**M. S. Burger, C. A. Krentz, S. S. Mercer and G. A. Gagnon**
- 361 Hydrologic model combined with a GIS for estimating hydrologic balance at watershed scale: application to the Macta watershed (north-western Algeria)  
**A. Mendas, M. Errih and F. Bouchenak**
