

Contents

- 471 Relationships between specific ultraviolet absorbance and trihalomethane precursors of different carbon sources
Alex T. Chow, Randy A. Dahlgren, Qian Zhang and P. K. Wong
- 481 Simultaneous removal of cyanobacteria and an earthy odor compound by a combination of activated carbon adsorption, coagulation, and ceramic microfiltration
T. Matsushita, Y. Matsui, D. Sawaoka and K. Ohno
- 489 Oleaginous seeds, press-cake and seed husks for the biosorption of metals
J. Boucher, C. Chabloz, O. Lex and I. W. Marison
- 501 Effects of reversible and irreversible membrane fouling on virus removal by a coagulation–microfiltration system
Nobutaka Shirasaki, Taku Matsushita, Yoshihiko Matsui and Koichi Ohno

Practical Papers

- 507 Disinfectant efficacy in distribution systems: a pilot-scale assessment
Graham A. Gagnon, H el ene Baribeau, Simon O. Rutledge, Robert Dumancic, Adrian Oehmen, Christian Chauret and Susan Andrews
- 519 Presence of arsenic, iron and manganese in groundwater within the gold-belt zone of Ghana
R. Buamah, B. Petrusevski and J. C. Schippers
- 531 Development and implementation of a corrosion control algorithm based on calcium carbonate precipitation potential (CCPP) in a drinking water distribution system
Do-Hwan Kim, Dong-Youn Kim, Soon-Heon Hong, Ji-Won Kim and Chang-Won Kim
