

Food Additives & Contaminants

| | |
|--|------|
| Formation of trihalomethanes in foods and beverages <i>A.-T. Huang and S. Batterman</i> | 947 |
| Estimate of intake of benzoic acid in the Belgian adult population <i>S. Vandevijvere, M. Andjelkovic, M. De Wil, C. Vinkx, I. Huybrechts, J. Van Loco, H. Van Oyen and L. Goeyens</i> | 958 |
| Preparation of quality control materials for the determination of sulfonamides in animal feed <i>V. Jiménez, R. Companyó and J. Guiteras</i> | 969 |
| Evaluation of three different microbial inhibition tests for the detection of sulphamethazine residues in the edible tissues of rabbit <i>Ivona Kožárová, Jana Janošová, Dionýz Máté and Soňa Tkáčiková</i> | 978 |
| Predicted intake of trace elements and minerals via household drinking water by 6-year-old children from Krakow (Poland). Part 4: Copper <i>H. Barton</i> | 988 |
| Trace elements in Canadian field peas: a grain safety assurance perspective <i>E. Gawalko, R. G. Garrett, T. Warkentin, Ning Wang and A. Richter</i> | 1002 |
| Development of an LC-MS/MS method for the determination of pesticides and patulin in apples <i>H.B. Christensen, M.E. Poulsen, P.H. Rasmussen and D. Christen</i> | 1013 |
| Exposure to pesticides residues from consumption of Italian blood oranges <i>B. Fallico, M.G. D'Urso and E. Chiappara</i> | 1024 |
| Influence of post-harvest application rates of cyprodinil, treatment time and temperature on residue levels and efficacy in controlling green mould on 'Valencia' oranges <i>Mario Schirra, Salvatore D'Aquino, Paolo Cabras and Alberto Angioni</i> | 1033 |
| Probabilistic assessment of the cumulative dietary acute exposure of the population of Denmark to organophosphorus and carbamate pesticides <i>B.H. Jensen, A. Petersen and T. Christensen</i> | 1038 |
| Antimutagenic and antigenotoxic effects of vegetable matrices on the activity of pesticides <i>M. Isidori, E. Caterino, E. Criscuolo, V. Fatigati, G. Liguori and A. Parrella</i> | 1049 |
| Fusarium mycotoxin content of UK organic and conventional oats <i>S.G. Edwards</i> | 1063 |
| Deoxynivalenol suppresses circulating and splenic leukocyte subpopulations in BALB/c mice: dose response, time course and sex differences <i>Xianai Wu, Marian Kohut, Joan Cunnick, Ted Bailey and Suzanne Hendrich</i> | 1070 |
| Impact of industrial treatments on ochratoxin A content in artificially contaminated cocoa beans <i>Pierre Manda, Djédjé Sébastien Dano, James Halbin Kouadio, Aïssata Diakité, Béatrice Sangaré-Tigori, Miezhan Jean Marc Ezoulin, Ava Soumahoro, Arjounma Dembele and Gérard Fourny</i> | 1081 |
| Effect of some habitual cooking processes on the domoic acid concentration in the cockle (<i>Cerastoderma edule</i>) and Manila clam (<i>Ruditapes philippinarum</i>) <i>A. Vidal, J. Correa and J. Blanco</i> | 1089 |
| Determination of polycyclic aromatic hydrocarbons (PAHs) in commonly consumed Nigerian smoked/grilled fish and meat <i>V.O.E. Akpambang, G. Purcaro, L. Lajide, I.A. Amoo, L.S. Conte and S. Moret</i> | 1096 |
| Effect-based and chemical analysis of polycyclic aromatic hydrocarbons in smoked meat: a practical food-monitoring approach <i>K. Kuhn, B. Nowak, A. Behnke, A. Seidel and A. Lampen</i> | 1104 |
| Search for a more adequate test to predict the long-term migration from the PVC gaskets of metal lids into oily foods in glass jars <i>Nadine Graubardt, Maurus Biedermann, Katell Fiselier, Luciana Bolzoni, Turno Pedrelli, Chiara Cavalieri, Catherine Simoneau and Koni Grob</i> | 1113 |
