Food Additives & Contaminants

Foreword <i>Franz Berthiller</i>	575
Molecular characterization of atoxigenic strains for biological control of aflatoxins in Nigeria <i>M. Donner, J. Atehnkeng, R. A. Sikora, R. Bandyopadhyay and P.J. Cotty</i>	576
Associations of planting date, drought stress, and insects with <i>Fusarium</i> ear rot and fumonisin B ₁ contamination in California maize <i>M.W. Parsons and G.P. Munkvold</i>	591
Formation of fumonisins and other secondary metabolites by <i>Fusarium oxysporum</i> and <i>F. proliferatum</i> : a comparative study <i>A. Waskiewicz, P. Golinski, Z. Karolewski, L. Irzykowska, J. Bocianowski, M. Kostecki and Z. Weber</i>	608
Prevention of <i>Fusarium</i> mycotoxin contamination by breeding and fungicide application to wheat <i>S. Lehoczek-Krsjak, Á. Szabó-Hevér, B. Tóth, C. Kótai, T. Bartók, M. Varga, L. Farády and Á. Mesterházy</i>	616
Reduction of <i>Fusarium</i> head blight and deoxynivalenol in wheat with early fungicide applications of prothioconazole <i>S.G. Edwards and N.P. Godley</i>	629
Descriptive modelling to predict deoxynivalenol in winter wheat in the Netherlands <i>H.J. Van Der Fels-Klerx, S.L.G.E. Burgers and C.J.H. Booij</i>	636
Limiting mycotoxins in stored wheat <i>Naresh Magan, David Aldred, Kalliopi Mylona and Ronald J.W. Lambert</i>	644
Strategies to reduce mycotoxin levels in maize during storage: a review <i>S.N. Chulze</i>	651
Evaluating the technical feasibility of aflatoxin risk reduction strategies in Africa <i>Felicia Wu and Pornsri Khlanguwiset</i>	658
Fate of <i>Fusarium</i> mycotoxins in the cereal product supply chain: the deoxynivalenol (DON) case within industrial bread-making technology <i>E. Bergamini, D. Catellani, C. Dallasta, G. Galaverna, A. Dossena, R. Marchelli and M. Suman</i>	677
Rapid and advanced tools for mycotoxin analysis: a review <i>C.M. Maragos and M. Busman</i>	688
Correlation and classification of single kernel fluorescence hyperspectral data with aflatoxin concentration in corn kernels inoculated with <i>Aspergillus flavus</i> spores <i>H. Yao, Z. Hruska, R. Kincaid, R. Brown, T. Cleveland and D. Bhatnagar</i>	701
Acidic pH as a determinant of <i>TRI</i> gene expression and trichothecene B biosynthesis in <i>Fusarium graminearum</i> <i>J. Merhej, A.L. Boutigny, L. Pinson-Gadais, F. Richard-Forget and C. Barreau</i>	710
Identification, mycotoxin risk and pathogenicity of <i>Fusarium</i> species associated with fig endosepsis in Apulia, Italy <i>A. Moretti, L. Ferracane, S. Somma, V. Ricci, G. Mulè, A. Susca, A. Ritieni and A.F. Logrieco</i>	718
Trichothecene and beauvericin mycotoxin production and genetic variability in <i>Fusarium poae</i> isolated from wheat kernels from northern Italy <i>S. Somma, C. Alvarez, V. Ricci, L. Ferracane, A. Ritieni, A. Logrieco and A. Moretti</i>	729
Contamination by moulds of grape berries in Slovakia <i>P. Mikušová, A. Ritieni, A. Santini, G. Juhasová and A. Šrobárová</i>	738
