EDITORIAL POLICY

CEREAL CHEMISTRY® is an international journal publishing high-quality, scientific papers reporting significant, recent research. Acceptable research areas include those dealing with biochemistry, biotechnology, products, processes, and analytical procedures associated with cereals and other grain crops. Papers may be comprehensive reviews or reports of original investigations that make a definite contribution to existing knowledge. The content must not have been published or accepted for publication elsewhere, and papers must not be under consideration by another journal.

Paid advertisements are accepted. However, no endorsement or any statement of claims made in advertisements is assumed by this journal or by AACC International, Inc.

The current processing fees for CEREAL CHEMISTRY are \$300 (for the first five pages) and \$120 each page, or portion thereof, thereafter for members of AACC International, Inc. and \$400 (for the first five pages) and \$150 each page, or portion thereof, thereafter for nonmembers. All fees are subject to change without notice. Reprints are available to authors at a nominal cost; an order form will be provided and must be returned with the proof. A list of recently accepted manuscripts appears on AACCnet (www.aaccnet.org). For further information on recently accepted manuscripts, contact the Editorial Office.

Direct inquiries on editorial policy and review process to: Dr. R. Carl Hosenev, Editor-in-Chief, 852 Church Ave Manhattan, KS 66502 U.S.A. (Phone: +1.785.537.5199; Fax: +1.785.537.5199; E-mail: chosenev@scisoc.org). Submit manuscripts directly to "Manuscript Central". Further information is provided in the "Instructions to Authors" on AACCnet (www.aaccnet.org). Direct inquiries to: Editorial Office, AACC International, Inc., 3340 Pilot Knob Rd., St. Paul, MN 55121.

CEREAL CHEMISTRY®

AN INTERNATIONAL JOURNAL SINCE 1924

VOLUME 85, NUMBER 6

November-December 2008

- 713 NOTE: Modified Wheat Starches Increase Bread Yield.
R. A. Miller, C. C. Maningat, and R. C. Hosenev
- 716 Stability of Vitamin E in Wheat Flour and Whole Wheat Flour During Storage. *M. Møller Nielsen and Å. Hansen*
- 721 Understanding Consumer Preference for Functional Barley Tortillas Through Sensory, Demographic, and Behavioral Data.
A. Toma, M. B. Omary, K. A. Rosentrater, E. A. Arndt, N. Prasopsunwattana, S. Chongcham, R. A. Flores, and S. P. Lee
- 730 Effects of Selected Barley Cultivars and Their Pearling Fractions on Inhibition of Human LDL Oxidation In Vitro Using a Modified Conjugated Dienes Method. *E.-S. M. Abdel-Aal and T. H. Gamel*
- 738 Increasing Slowly Digestible Starch Content of Normal and Waxy Maize Starches and Properties of Starch Products.
R. Wongsagonsup, S. Varavinit, and J. N. BeMiller
- 746 Commercial Evaluation of a Continuous Micronutrient Fortification Process for Nixtamal Tortillas. *M. L. Dunn, S. O. Serna-Saldivar, D. Sanchez-Hernandez, and R. W. Griffin*
- 753 Rheological Properties of Wheat Flour Dough and the Relationship with Bread Volume. I. Creep-Recovery Measurements.
F. Van Bockstaele, I. De Leyn, M. Eeckhout, and K. Dewettinck
- 762 Rheological Properties of Wheat Flour Dough and the Relationship with Bread Volume. II. Dynamic Oscillation Measurements.
F. Van Bockstaele, I. De Leyn, M. Eeckhout, and K. Dewettinck
- 769 Dynamic QTL Analysis on Rice Fat Content and Fat Index Using Recombinant Inbred Lines. *H. L. Wang, W. W. Zhang, L. L. Liu, Y. Y. Shen, J. K. Wang, L. Jiang, H. Q. Zhai, and J. M. Wan*
- 776 NOTE: Lysophosphatidylcholine Identified as Channel-Associated Phospholipid of Maize Starch Granules. *S.-H. Lee and J. N. BeMiller*
- 780 Ingredient Characterization and Hardening of High-Protein Food Bars: An NMR State Diagram Approach. *Y. Li, K. Szlachetka, P. Chen, X. Lin, and R. Ruan*
- 787 Development and Validation of Prediction Models for Rice Surface Lipid Content and Color Parameters Using Near-Infrared Spectroscopy: A Basis for Predicting Rice Degree of Milling.
M. I. Saleh, J. F. Meullenet, and T. J. Siebenmorgen
- 792 Effect of Sorghum Decortication and Use of Protease Before Liquefaction with Thermoresistant α -Amylase on Efficiency of Bioethanol Production. *E. Pérez-Carrillo, S. O. Serna-Saldivar, M. M. Alvarez, and M. L. Cortes-Callejas*

Dawn Wuest

Authorization to photocopy copyrighted material for internal or personal use, or the internal or personal use of specific clients, is granted by AACC International, Inc., for libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service, provided that the base fee of \$7.00 for per copy of an article is paid directly to CCC, 222 Rosewood Dr., Danvers, MA 01923. Phone: 978-750-8400. 0009-0352/08 \$7.00 + 00

2009 Print Subscriptions: Number of issues per year: 6 (bimonthly). Cost: \$618 U.S.A.; \$660 Elsewhere; Canadian subscribers add 5% GST/HST (Canadian GST #R131584807). Shipping included in yearly subscription rate. No agency discount available.

CURRENT print + ONLINE subscribers: Renewal invoices for 2009 will be mailed with online pricing.

NEW print + ONLINE subscribers: Online access can be added to your *Cereal Chemistry* print subscription for an additional fee. Fill out form at <http://cerealchemistry.aaccnet.org/page/subscribe>. For terms of use for *Cereal Chemistry* journal online, go to <http://www.aaccnet.org/cerealchemistry/Terms.pdf>

Single Issue Purchases: Current volume year cost: \$117/issue U.S.A.; \$128/issue elsewhere. Other years: \$124/issue U.S.A.; \$135/issue elsewhere.

Single Article Purchases: PDF copies of articles published from 1997 to present may be purchased online at <http://cerealchemistry.aaccnet.org/> to locate the article and then click the "Buy Article" link.

Payment Information: Prepayment is required. AACC International accepts check payments. Checks must be drawn on U.S. Federal Reserve System Bank. AACC International accepts credit card payments (MasterCard, American Express, and VISA).

Change of Subscription Address: Provide your current mailing label to AACC International U.S.A. Headquarters with forwarding address information 6 weeks before the change.

Business Offices: AACC International Headquarters, 3340 Pilot Knob Road, St. Paul, MN 55121 U.S.A.; Phone +1.651.454.7250, 1.800.328.7560; Fax +1.651.454.0766; E-mail: aacc@scisoc.org

CEREAL CHEMISTRY® (ISSN: 0009-0352) is published bimonthly by AACC International, Inc., 3340 Pilot Knob Road, St. Paul, MN 55121. Phone: +1.651.454.7250. Periodicals postage paid at St. Paul, MN, and additional mailing offices. **Postmaster: Send address changes to Cereal Chemistry, 3340 Pilot Knob Road, St. Paul, MN 55121.**

- 799 REVIEW: Thioredoxin h System and Wheat Seed Quality. A. Zahid, S. Afoulous, and R. Cazalis
- 808 Technological and Nutritional Properties of Flours and Tortillas from Nixtamalized and Extruded Quality Protein Maize (*Zea mays* L.). R. Gutiérrez-Dorado, A. E. Ayala-Rodríguez, J. Milán-Carrillo, J. López-Cervantes, J. A. Garzón-Tiznado, J. A. López-Valenzuela, O. Paredes-López, and C. Reyes-Moreno
- 817 Associations Between *Vrs1* Alleles and Grain Quality Traits in Spring Barley *Hordeum vulgare* L. Y. Turuspekov, J. M. Martin, J. G. P. Bowman, B. S. Beecher, and M. J. Giroux
- 824 Quantitation of LMW-GS to HMW-GS Ratio in Wheat Flours. F. J. Cinco-Moroyoqui and F. MacRitchie
- 830 Assessing Fermentation Quality of Grain Sorghum for Fuel Ethanol Production Using Rapid Visco-Analyzer. R. Zhao, S. Bean, X. Wu, and D. Wang
- 837 Sorghum Protein Extraction by Sonication and Its Relationship to Ethanol Fermentation. R. Zhao, S. R. Bean, and D. Wang
- 843 Author Index to Volume 85
- 847 Subject Index to Volume 85
- 854 Statement of Ownership
