A novel analysis of grapevine berry tissue demonstrates a variety-dependent correlation between tissue vitality and berry shrivel

Contents

Accumulation of potassium in grapevine rootstocks (<i>Vitis</i>) as affected by dry matter partitioning, root traits and transpiration _____	273
<i>S. Kodur, J.M. Tisdall, C. Tang and R.R. Walker</i>	
Effect of irrigation and variety on oxygen ($\delta^{18}\text{O}$) and carbon ($\delta^{13}\text{C}$) stable isotope composition of grapes cultivated in a warm climate _____	283
<i>S. Gómez-Alonso and E. García-Romero</i>	
Scion genotype controls biomass allocation and root development in grafted grapevine _____	290
<i>J.-P. Tandonnet, S.J. Cookson, P. Vivin and N. Ollat</i>	
Influence of sustained deficit irrigation on colour parameters of Cabernet Sauvignon and Shiraz microscale wine fermentations _____	301
<i>Y.M. Chalmers, M.O. Downey, M.P. Krstic, B.R. Loveys and P.R. Dry</i>	
Effects of mechanical thinning on fruit and wine composition and sensory attributes of Grenache and Tempranillo varieties (<i>Vitis vinifera</i> L.) _____	314
<i>M.P. Diago, M. Vilanova, J.A. Blanco and J. Tardaguila</i>	
A novel analysis of grapevine berry tissue demonstrates a variety-dependent correlation between tissue vitality and berry shrivel _____	327
<i>S. Fuentes, W. Sullivan, J. Tilbrook and S. Tyerman</i>	
Comparison of major volatile compounds from Riesling and Cabernet Sauvignon grapes (<i>Vitis vinifera</i> L.) from fruitset to harvest _____	337
<i>C.M. Kalua and P.K. Boss</i>	
The development of a method for the extraction of carotenoids and chlorophylls from grapevine leaves and berries for HPLC profiling _____	349
<i>J.G. Lashbrooke, P.R. Young, A.E. Strever, C. Stander and M.A. Vivier</i>	
Thermal taster status associates with oral sensations elicited by wine _____	361
<i>G.J. Pickering, A. Moyes, M.R. Bajec and N. Decourville</i>
