Original articles

- 1195** Development of a process chain for the realization of multilayer weft knitted fabrics showing complex 2D/3D geometries for composite applications
C Cherif, S Krzywinski, O Diestel, C Schulz, H Lin, P Klug and W Trümper
- 1211** Effect of alum treatment on the mechanical and antibacterial properties of poly- γ -glutamic acid nanofibers
T Tajima and S Sukigara
- 1220** Effect of CO₂ laser irradiation on the properties of cotton fabric
YLF Chow, A Chan and C-w Kan
- 1235** Effect of relative humidity coupled with air gap on heat transfer of flame-resistant fabrics exposed to flash fires
J Li, Y Lu and X Li
- 1244** Fiber length distribution variability in cotton bale classification: Interactions among length, maturity and fineness
M Krifa
- 1255** Fiber trapping comparison of embeddable and locatable spinning with sirofil and siro core-spinning with flute pipe air suction
Z Xia, X Wang, W Ye, HA Eltahir and W Xu
- 1263** In-plane shear properties of polyester satin fabric by yarn pull-out method
K Bilisik
- 1282** Modelling and simulation of an innovative fabric coating process using artificial neural networks
R Furferi, L Governi and Y Volpe
- 1295** Protecting the extremities of military personnel: fragment protective performance of one- and two-layer ensembles
S Sakaguchi, D Carr, I Horsfall and L Girvan
