Original articles

- 417 A new method for measuring of rupture properties of fabrics
R Kovar and MK Dolatabadi
- 430 An analysis on air permeability of polyester/viscose blended needle-punched nonwovens
E Çiñçik and E Koç
- 443 3D geometrical modelling of tubular braids
T Alpyildiz
- 454 A new shape factor measure for characterizing the cross-section of profiled fiber
Z Wang, Y Zhong and S Wang
- 463 A new test and apparatus for characterizing the time-dependent recovery of polymeric fibers and yarns from bending
MC Marchesi, FB Vangosa and A Pavan
- 474 An optimum design study of the yarn-channel shape of the air-interlacing nozzle by analysis of fluid flow
M Juraeva, DJ Song and KJ Ryu
- 484 A new textile-based approach to assess the antimicrobial activity of volatiles
S Liebmingner, M Aichner, L Oberauner, M Fürnkranz, M Cardinale and G Berg
- 492 An analytical model for through-thickness permeability of woven fabric
X Xiao, X Zeng, A Long, H Lin, M Clifford and E Saldaeva
- 502 A new method in fabric drape measurement and analysis of the drape formation process
B Al-Gaadi, F Göktepe and M Halász
- 513 An instrument for assessing fabric prickle propensity
DJ Ramsay, DB Fox and GRS Naylor

Letter to the editor

- 521 Comments on 'Importance of air spaces when comparing fabric thermal resistance'
F Wang

522 Abstracts
