CONTENTS

1. Introduction	59
2. Historical overview	62
3. Theoretical evolution of electrospinning	66
3.1. Basics of electrostatics	66
3.2. Surface tension and electric bi-layer	68
3.2.1 <i>Surface tension</i>	68
3.2.2 <i>Electric bi-layer</i>	69
3.3. Electric pressure	72
3.4. Disintegration of liquid bodies	74
3.5. Contemporaneous theories of electrospinning onset	75
3.6. Self-organisation of electrospinning jets on free liquid surfaces	78
3.7. Electrospinning as an application of the physical law of dielectric diffusion	82
4. Liquid jet in an electric field	83
4.1. Jet path	84
4.1.1 <i>Rayleigh instability</i>	84
4.1.2 <i>Stable jet zone</i>	87
4.1.3 <i>Bending instability</i>	89
4.2. Solvent evaporation	93
5. Special collectors	95
5.1. Static collectors	96
5.2. Dynamic collectors and spinning electrodes	100
5.3. Electrostatic field in a vicinity of a charged grid	103
6. Electrospinning variants	105
6.1. Melt-electrospinning	105
6.2. Core-shell electrospinning	111
7. Exceptional features of electrospinning	116
7.1. Electric wind in electrospinning	116
7.2. Irradiation caused by electrospinning	123
7.2.1 <i>Radioactive radiation</i>	124
7.2.2 <i>St. Elmo's fire</i>	126
7.2.3 <i>Roentgen radiation</i>	127
8. Polymeric solutions for electrospinning	127
8.1. Polymer solubility	128
8.1.1 <i>Solubility parameters</i>	130
8.2. Volatility of a solvent	131

8.3. Concentration and viscosity of polymer solutions – Berry number 133

9. Conclusion and perspectives

135

CONTENTS

1. Introduction 135

2. Historical overview 135

3. Theoretical evolution of electrospinning 135

3.1. Spinning process and electric field 135

3.1.1. Electric field 135

3.1.2. Electric field 135

3.2. Spinning process 135

3.2.1. Spinning process 135

3.2.2. Spinning process 135

3.3. Comparison of electrospinning with other fiber spinning methods 135

3.4. Advantages of electrospinning as an application of the physical law of electrostatics 135

4. Fundamentals of electrospinning 135

4.1. Electrospinning 135

4.1.1. Spinning process 135

4.1.2. Spinning process 135

4.2. Spinning process 135

5. Special collectors 135

5.1. Electrospinning process 135

5.2. Electrospinning process 135

6. Electrospinning process 135

6.1. Electrospinning process 135

7. Electrospinning process 135

7.1. Electrospinning process 135

7.2. Electrospinning process 135

8. Polymer solutions for electrospinning 135

8.1. Polymer solutions 135

8.1.1. Polymer solutions 135

8.2. Viscosity of a polymer solution 135
