CONTENTS

| | |
|--|-----|
| 1. Introduction | 97 |
| 2. Overview of polyester | 98 |
| 2.1. Overview of manufacturing of fiber, yarn, and fabric | 99 |
| 2.2. Fabric formation | 102 |
| 3. Overview of wet processing in the production of polyester material | 102 |
| 4. Coloration problems originating from manufacturing polyester | 104 |
| 4.1. Problems caused by polymerization | 104 |
| 4.2. Problems caused by glass transition temperature | 105 |
| 4.2.1. <i>The use of carriers</i> | 106 |
| 4.2.2. <i>High-temperature dyeing</i> | 107 |
| 4.2.3. <i>Thermofixation</i> | 107 |
| 4.2.4. <i>Modification of the chemical structure of fiber to reduce its glass transition temperature</i> | 108 |
| 4.3. Problems caused by oligomers | 109 |
| 4.4. Problems due to melt spinning | 111 |
| 4.5. Problems due to drawing and draw line | 111 |
| 4.6. Problems due to cutting | 112 |
| 4.7. Problems due to fiber size and cross-sectional shape | 113 |
| 5. Problems originating in the formation of yarns | 113 |
| 5.1. Problems originating from texturing filament yarns | 114 |
| 5.2. Package dyeing problems originating in yarn winding | 115 |
| 6. Problems originating in fabric formation | 117 |
| 7. Problems originating from pretreatment | 118 |
| 7.1. Problems due to singeing | 119 |
| 7.2. Problems due to desizing | 119 |
| 7.3. Problems due to scouring | 121 |
| 7.4. Problems due to bleaching | 122 |
| 8. Problems originating from water quality | 123 |
| 9. Problems originating from heat setting | 126 |
| 10. Problems originating from steaming | 127 |
| 11. Problems originating from other wet processes | 127 |

| | |
|---|------------|
| 11.1. Problems caused by foaming | 127 |
| 11.2. Problems caused by dyeing processes | 128 |
| 11.3. Problems caused by reduction-clearing process | 131 |
| 12. Problems due to application of disperse dyes | 131 |
| 12.1. Dye parameters | 133 |
| 12.1.1. <i>Disperse dyes</i> | 133 |
| 12.1.2. <i>Aqueous phase transfer</i> | 134 |
| 12.1.3. <i>Dye-fiber substantivity</i> | 135 |
| 12.1.4. <i>Solubility</i> | 136 |
| 12.2. System parameters | 137 |
| 12.2.1. <i>Temperature</i> | 137 |
| 12.2.2. <i>Dye particle size</i> | 137 |
| 12.2.3. <i>Dispersing agents</i> | 138 |
| 12.2.4. <i>Levelling agents</i> | 138 |
| 12.2.5. <i>Liquor ratio</i> | 138 |
| 12.2.6. <i>Dyebath pH</i> | 139 |
| 12.2.7. <i>Carriers</i> | 139 |
| 12.2.8. <i>Exhaustion</i> | 140 |
| 12.2.9. <i>Levelness</i> | 141 |
| 12.2.10. <i>Migration</i> | 141 |
| 12.2.11. <i>Fastness</i> | 142 |
| 12.3. Problems originating in equipments | 142 |
| 12.3.1. <i>Dyeing machines</i> | 143 |
| 12.3.2. <i>Issues related to other machinery</i> | 145 |
| 12.4. Problems originating from human factors | 147 |
| 12.4.1. <i>Chemical storage</i> | 147 |
| 12.4.2. <i>Equipment and maintenance</i> | 147 |
| 12.4.3. <i>Discipline and training</i> | 148 |
| 12.4.4. <i>Color matching communication</i> | 148 |
| 12.4.5. <i>Cleanliness for better motivation</i> | 148 |
| 13. Summary | 148 |
