# CONTENTS

<b>1. Introduction</b>	235
1.1. Classification of medical garments	236
1.1.1. <i>Protective function domain</i>	236
1.1.2. <i>Treatment function domain</i>	236
1.1.3. <i>Caring function domain</i>	236
1.2. Development of medical garments	237
1.2.1. <i>Historical development of medical garments</i>	237
1.2.2. <i>Trends of medical garments</i>	238
1.2.3. <i>Future scope of medical garments</i>	238
<b>2. Review of medical garments for protective function</b>	238
2.1. Medical drapes and gowns	239
2.1.1. <i>Textile materials for medical drapes and gowns</i>	239
2.1.2. <i>Design considerations for medical gowns</i>	242
2.2. Hip protectors (HP)	243
2.2.1. <i>Textiles used for HP</i>	245
2.2.2. <i>Design considerations for improvement on the compliance</i>	245
<b>3. Review of medical garments for treatment function</b>	247
3.1. Pressure garments (PGs)	247
3.1.1. <i>Textiles used for PG</i>	247
3.1.2. <i>Considerations on the design of PGs</i>	249
3.2. Compression stockings (CSs)	250
3.2.1. <i>Textiles for CSs</i>	251
3.2.2. <i>Considerations on the application of CSs</i>	251
3.3. Wet dressings	252
3.3.1. <i>Functions of wet dressings</i>	253
3.3.2. <i>Textiles used for wet dressings</i>	253
3.3.3. <i>Limitations of wet dressings</i>	254
<b>4. Review of apparel products for caring function</b>	255
4.1. Superabsorbent materials (SAMs) used in disposable healthcare products	255
4.2. Wound dressings	256
4.3. Diapers for incontinence problems	257
<b>5. Review of intelligent medical garments</b>	258
5.1. Application of conductive textile material into the smart garment	258
5.2. Examples of intelligent medical garments	259
5.2.1. <i>Smart garments for vital signs and motion monitoring</i>	259
5.2.2. <i>Smart diapers</i>	261
<b>6. Case studies in the development of apparel for the elderly and the disabled</b>	262

6.1.	Stoma bag underpants	263
6.1.1.	<i>Existing problems faced by the users carrying stoma bag</i>	263
6.1.2.	<i>Techniques adopted for the development of stoma bag underpants</i>	264
6.2.	Urine bag pants	264
6.2.1.	<i>Problems faced by people carrying a urine bag</i>	265
6.2.2.	<i>Techniques adopted for the development of urine bag pants</i>	267
6.3.	Pants for chair-bound people	267
6.3.1.	<i>Problems faced by chair-bound people</i>	268
6.3.2.	<i>Techniques applied for the development of pants for chair-bound people</i>	268
6.4.	Sun block protective garments for patients with xeroderma pigmentosum	270
6.4.1.	<i>Problems faced by patients with XP</i>	270
6.4.2.	<i>Techniques applied for the development of a sunblock protective garment for patients with XP</i>	271
7.	<b>Future prospects of developing apparel for the elderly and the disabled</b>	272
8.	<b>Conclusion</b>	274
