VOLUME 102 · NUMBER 11 · 2011

- PAPERS**
- 905 Measurement of cloth fell position using image analysis**
B. Yıldırım and G. Başer
- 917 A conceptual model of diversification in apparel retailing: the case of Next plc**
S.M. Wigley
- 935 Mechatronic design and implementation of a smart robotic hanger for garment inspection**
E.H.K. Fung, Y.K. Wong, X.Z. Zhang, C.W.M. Yuen and W.K. Wong
- 948 Use of low-level plasma for enhancing the shrink resistance of wool fabric treated with a silicone polymer**
M. Naebe, P.G. Cookson, R. Denning and X. Wang
- 957 Development of mathematical model to predict vertical wicking behaviour. Part I: flow through yarn**
B. Das, A. Das, V.K. Kothari and R. Fangueiro
- 971 Mathematical model to predict vertical wicking behaviour. Part II: flow through woven fabric**
B. Das, A. Das, V.K. Kothari and R. Fangueiro
- 982 Finite element simulation of three-dimensional angle-interlock woven fabric undergoing ballistic impact**
L. Jin, B. Sun and B. Gu
- 994 A study of the drafting force in roller drafting and its influence on sliver irregularity**
Q. Lin, W. Oxenham and C. Yu
