CONTENTS

Papers

- 647 Dynamic fabric modelling and simulation using deformable models**
H. Hedfi, A. Ghith and H. BelHadjSalah
- 668 Ranking fibre and process parameters affecting thermal resistance of needle-punched blankets using neural network model**
V.K. Midha
- 675 Screening and identification of *Acinetobacter junii* for *Apocynum vernetum* L. fiber enzymatic retting**
L. Zheng, B. Du and W. Xue
- 681 Blending water-soluble aliphatic–aromatic copolyester in starch for enhancing the adhesion of sizing paste to polyester fibers**
E. Jin, Z. Zhu, Y. Yang, G. Miao and M. Li
- 689 A viscoelastic model for the compaction of fibrous materials**
P.A. Kelly
- 700 Impact of structural variations in hollow yarn on heat and moisture transport properties of fabrics**
A. Mukhopadhyay, S.M. Ishtiaque and D. Uttam
- 713 Trajectories of fibers and analysis of yarn quality for compact spinning with pneumatic groove**
H. Dou and S. Liu
- 719 Objective evaluation of multidirectional fabric creasing**
L. Fridrichova and K. Zelova
- 726 Application of stitch-bonded multi-pplies made by using the extended warp knitting process: reinforcements with symmetrical layer arrangement for concrete**
J. Hausding, E. Lorenz, R. Ortlepp, A. Lundahl and C. Cherif
