VOLUME 103 · NUMBER 10 · 2012

- PAPERS**
- 1031** **Mathematical modeling of spacer fabrics under impulsive loading**  
*F. Arabzadeh, M. Sheikhzadeh, M. Ghane and S.M. Hejazi*
- 1042** **Similarities and differences in forming purchase intention toward a US apparel brand: a comparison of Chinese and Indian consumers**  
*B. Jin, M. Gavin and J.H. Kang*
- 1055** **Analysis of sliver thickness variation from process perturbations in roller drafting**  
*J.S. Kim, M.W. Suh and Y. Huh*
- 1063** **A finite element approach to the modelling of fabric mechanics and its application to virtual fabric design and testing**  
*H. Lin, M.J. Clifford, A.C. Long, K. Lee and N. Guo*
- 1077** **Textile-based microfluidics: modulated wetting, mixing, sorting, and energy harvesting**  
*G.O.F. Parikesit, F. Praselia, G.A. Pribadi, D.C. Simbolon, G.Y. Pradhana, A.R. Prastowo, A. Gunawan, K. Suryopratomo and I. Kusumaningtyas*
- 1088** **Structural studies of plasma polymers obtained in pulsed dielectric barrier discharge of TEOS and HMDSO on nylon 66 fabrics**  
*K.H. Kale and S.S. Palaskar*
- 1099** **Effect of acid-catalyzed sol-gel silica coating on the properties of cotton fabric**  
*Y. Li and Z. Cai*
- 1108** **Modification of wool fabric treated with tetrabutyl titanate by hydrothermal method**  
*H. Zhang and H. Zhu*
- 1116** **Numerical simulation on the condensing effect of suction slot in compact spinning with lattice apron**  
*W. Xue, M. Wei, N. Zhang and L. Cheng*
- 1127** **Integration of stretchable and washable electronic modules for smart textile applications**  
*T. Vervust, G. Buyle, F. Bossuyt and J. Vanfleteren*
- 1139** **Contacting electronics to fabric circuits with nonconductive adhesive bonding**  
*T. Linz, M. von Krshiwoblozki, H. Walter and P. Foerster*
