VOLUME 103 · NUMBER 11 · 2012

- PAPERS**
- 1151 A single-layer stitched electrotextile as flexible pressure mapping sensor**
H. Zhang and X.-M. Tao
- 1160 Effect of nozzle polarity and connection on electrospinning of polyacrylonitrile nanofibers**
U. Ali, X. Wang and T. Lin
- 1169 Preparing dyeable PP fiber nanocomposites using the special cubic mixture experimental design**
M. Ataefard and S. Moradian
- 1183 Preparation and properties of superfine wool powder/chitosan complex membrane**
G.-z. Ke and W.-l. Xu
- 1189 Mechanical properties and microstructure of 3D sinking woven quartz fiber-reinforced silica composites by silicasol-infiltration-sintering**
C. Li, J. Zhu, Y. Liu, Z. Chen, Y. Jiang and D. Su
- 1197 Antibacterial effects of two Tunisian Eucalyptus leaf extracts on wool and cotton fabrics**
B. Ben Fadhel, A. Aissi, N. Ladhari, M. Deghrigue, R. Chemli and J.-P. Joly
- 1205 Predicting bending rigidity of woven fabrics using adaptive neuro-fuzzy inference system (ANFIS)**
B.K. Behera and R. Guruprasad
- 1213 Analysis of warp-knitted fabric structure. Part III: theoretical study on initial modulus of warp-knitted fabrics (reverse locknit, three- and four-needle sharkskin)**
H. Dabiryan, A.A.A. Jeddi and A. Rastgoo
- 1228 Stability and control of the convergence point for two-strand yarn spinning**
W.-Y. Liu, T.-Y. Huang, H.-M. Li and Y.-L. Li
- 1234 Antimicrobial activity of nanosilver-coated socks fabrics against foot pathogens**
J.P. Shastri, M.G. Rupani and R.L. Jain

Taylor & Francis
Taylor & Francis Group

The Textile Institute

1244 Study on microclimate conditions for woven fabrics from cotton-acrylic bulked yarn

A. Das and S.S. Yadav

1255 Modelling and simulation of 3D orthogonal fabrics for composite applications

R. Mishra, J. Militky, B.K. Behera and V. Banthia

TECHNICAL NOTE

1262 Comparison of the effectiveness of different silver-containing textile products on bacteria and human cells

B. Mahltig and H. Haase
