## CONTENTS

### *Papers*

- 691 Prediction of the handle characteristics of lightweight next-to-skin knitted fabrics using a fabric extraction technique**  
*H. Wang, T.J. Mahar and R. Hall*
- 698 Establishing thermal comfort: characterization of selected performance and physical properties of fabrics used in hospital operating room uniforms**  
*Y. Xu, R.H. McQueen, M. Strickfaden, A. Aslund and J.C. Batcheller*
- 706 Inter-laboratory comparison of biaxial tests for architectural textiles**  
*B. Bridgens, P. Gosling, G.-T. Jou and X.-Y. Hsu*
- 719 Improvement of filtration efficiency by fibre surface nanofibrillation**  
*M. Miao, M. Shan, N. Finn, J.A. Schütz, R. Wood and M. Ahern*
- 724 Effect of polymeric additives on the formation and properties of polyaniline films on polyester fabrics**  
*Y.-P. Zhao, Z.-S. Cai and X.-L. Fu*
- 733 Design and development of innovative textile pneumatic muscles**  
*G. Belforte, G. Eula and S. Appendino*
- 744 The prediction of seam strength of denim fabrics with mathematical equations**  
*B. Zervent Ünal*
- 752 Ultrasound-assisted wool bleaching**  
*M.I. Bahtiyari, K. Duran and A.E. Körlü*
- 757 Steady-state thermal comfort properties of fabrics incorporated with microencapsulated phase change materials**  
*S. Alay, C. Alkan and F. Göde*
- 766 Geometrical modelling of angle warp interlock fabrics**  
*S. Nauman, I. Cristian and F. Bousu*
- 777 Study on heat transmission through multilayer clothing assemblies under different convective modes**  
*A. Das, R. Alagirusamy, K. Shabaridharan and P. Kumar*
- 787 Needleless electrospinning: influences of fibre generator geometry**  
*H. Niu, X. Wang and T. Lin*
