ISO/TC 207 can get even better

Dr. Robert Page, the new Chair of ISO/TC 207, Environmental management, writes: “ISO/TC 207 is built on incredible foundations – its institutional strength, global reach and collective will to develop standards that matter. It is against this backdrop that ISO/TC 207 can get even better, to address calls for greater market relevance and more effective tools.”

ISO/IEC 27001 for SMEs

Information security management systems for small and medium-sized enterprises

Although many large organizations have been quick to see the benefits of ISO/IEC 27001:2005 – the information security management system standard – many SMEs have been slow adopters because of a lack of basic advice in its implementation. This will change with development of a new ISO handbook to demystify the process, due for publication in 2009.

The “Big D” becomes the “Green D”

Dallas is largely known across the globe for being big...big money, big business, and big hair (the hair styles made famous by the Dallas TV series)...and is appropriately nicknamed, “Big D”. However, the “Big D” is now known as “Green D” as a result of a three-year ISO 14001 implementation and certification programme across all major city departments, a first in any US municipal organization.
