2007 is forecast to be the warmest year yet
Four companies fined under the EU ETS

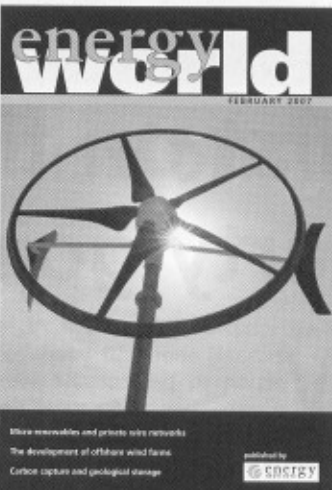

Features

- 10 **Oil and gas contract and operability techniques may reduce delays in developing offshore wind**
Peter Stratford
- 12 **Private wires, local generation, ESCOs and renewables in the energy network**
Keith Melton
- 15 **Training for biomass heating**
Sarah Davidson
- 16 **Composting to help energy crop growth**
Peter Davies
- 18 **The growth of renewable energy in China**
Gordon Feller
- 20 **Carbon capture and geological storage beneath the UK – status and prospects**
Professor Stuart Haszeldine
- 23 **Business rates – discouraging investment**
Keith Norman

Cover

Micro wind turbine on test on the roof of the New and Renewable Energy Centre in Blyth, north-east England. This issue rounds-up several articles on renewable energy; from major offshore wind farm projects around Britain's coast, through the use of micro-renewables and private wire networks, to methods to increase biomass energy crop yields.
