- 22** **Something will have to give in Britain's post fossil fuel era – people or energy use**  
*Peter Padley*

## Cover

They are building a new nuclear power station in Finland – so are we in the UK about to follow suit? This issue includes three articles on the prospects for new nuclear generating capacity for Britain, starting with a viewpoint from John Amos on page 2.

In Finland, construction of a third nuclear station at Olkiluoto is well underway by a consortium formed by Framatome ANP and Siemens, with more than 2,000 construction staff at the site. Commercial opening of the new plant, a 1600 MW European pressurised water reactor, has been postponed by two years to 2011 due to various construction problems.
