## PAPERS

### Atmospheric and Oceanic Optics

Method of obtaining wavefront slope data from through-focus point spread function measurements

*Samuel T. Thurman*

1

### Geometric Optics

Minimization of the shadow patterns produced by periodic mesh grids in extreme ultraviolet telescopes

*Frédéric Auchère, Julien Rizzi, Anne Philippon, and Pierre Rochus*

40

### Materials

Broadband terahertz circular polarizers with single- and double-helical array metamaterials

*ShengXi Li, ZhenYu Yang, Jing Wang, and Ming Zhao*

19

### Optical Devices

Efficient generation and control of different-order orbital angular momentum states for communication links

*Sergei Slussarenko, Ebrahim Karimi, Bruno Piccirillo, Lorenzo Marrucci, and Enrico Santamato*

61

### Physical Optics

When is polarimetric imaging preferable to intensity imaging for target detection?

*François Goudail and J. Scott Tyo*

46

### Scattering

Directional statistics-based reflectance model for isotropic bidirectional reflectance distribution functions

*Ko Nishino and Stephen Lombardi*

8

Study of scattering from a sphere with an eccentrically located spherical inclusion by generalized Lorenz–Mie theory: internal and external field distribution	<i>J. J. Wang, G. Gouesbet, Y. P. Han, and G. Gréhan</i>	24
Angle-suppressed scattering and optical forces on submicrometer dielectric particles	<i>M. Nieto-Vesperinas, R. Gomez-Medina, and J. J. Saenz</i>	54

**Copyright © 2011, Optical Society of America.** Copying of material in this journal is subject to payment of copying fees. The code that appears on the first page of each article in this journal gives the per-article copying fee for each copy of the article made beyond the free copying permitted under Sections 107 and 108 of the U.S. Copyright Law. This fee should be paid through the Copyright Clearance Center, Inc., 222 Rosewood Drive, Danvers, Mass. 01923. The same fees and procedures apply to articles published in previous volumes of this journal. Permission is granted to quote excerpts from articles in this journal in scientific works with the customary acknowledgment of the source, including the author's name and the journal name, volume, page, and year. Reproduction of figures and tables is likewise permitted in other articles and books, provided that the same information is printed with them, permission of one of the original authors is obtained, and notification is given to the Optical Society of America. Republication or systematic or multiple reproduction of any material (including electronic publication or reproduction) in this journal (including abstracts) is permitted only under license from the Optical Society of America; in addition, the Optical Society may require that permission also be obtained from one of the authors. Address inquiries and notices to the Director of Publications, Optical Society of America, 2010 Massachusetts Avenue, N.W., Washington, D.C. 20036. In the case of articles whose authors are employees of the United States Government or its contractors or grantees, the Optical Society of America recognizes the right of the United States Government to retain a nonexclusive, royalty-free license to use the author's copyrighted article for United States Government purposes.
