PAPERS

Atmospheric and Oceanic Optics

Generalized modified atmospheric spectral model for optical wave propagating through non-Kolmogorov turbulence — *Bindang Xue, Linyan Cui, Wenfang Xue, Xiangzhi Bai, and Fugen Zhou* — 912

Arbitrary moments of elliptical Gaussian-Schell beam in turbulent atmosphere — *Xiuxiang Chu* — 917

Coherence and Statistical Optics

Ambiguity function and phase-space tomography for nonparaxial fields — *Seongkeun Cho and Miguel A. Alonso* — 897

Diffraction and Gratings

Field singularities at lossless metal-dielectric right-angle edges and their ramifications to the numerical modeling of gratings — *Lifeng Li and Gérard Granet* — 738

Perturbation approach applied to modal diffraction methods — *Joerg Bischoff and Karl Hehl* — 859

Finite-difference time-domain and near-field-to-far-field transformation in the spectral domain: application to scattering objects with complex shapes in the vicinity of a semi-infinite dielectric medium — *Jérôme Muller, Gilles Parent, Gérard Jeandel, and David Lacroix* — 868

Fourier Optics and Signal Processing

Space–bandwidth ratio as a means of choosing between Fresnel and other linear canonical transform algorithms — *John J. Healy and John T. Sheridan* — 786

(Contents continued inside)

OSA® The Optical Society

In-phase supermode selection in ring-type and concentric-type multicore fibers using large-mode-area single-mode fiber — *Xiaolei Zhang, Xingyu Zhang, Qingpu Wang, Jun Chang, and Gang-Ding Peng* — 924

Optical Devices

Lens design of LED searchlight of high brightness and distant spot — *Shuang Zhao, Kai Wang, Fei Chen, Dan Wu, and Sheng Liu* — 815

Optics at Surfaces

Electromagnetic enhancement by a periodic array of nanogrooves in a metallic substrate — *Siwen Zhang, Haitao Liu, and Guoguang Mu* — 879

Physical Optics

Generalized radiometry model for the propagation of light within anisotropic and chiral media — *Jonathan C. Petruccelli and Miguel A. Alonso* — 791

Self-healing of tightly focused scalar and vector Bessel–Gauss beams at the focal plane — *Sunil Vyas, Yuichi Kozawa, and Shunichi Sato* — 837

Evaluation of cuspoid and umbilic diffraction catastrophes of codimension four — *Riccardo Borghi* — 887

Effect of polarization on a solid immersion lens of arbitrary thickness — *Kenneth M. Lim, Gary C. F. Lee, Colin J. R. Sheppard, Jacob C. H. Phang, Chee Leong Wong, and Xudong Chen* — 903

Thin Films

Minimizing light reflection from dielectric textured surfaces — *Alexei Deinega, Ilya Valuev, Boris Potapkin, and Yurii Lozovik* — 770

Vision, Color, and Visual Optics

Illumination estimation via thin-plate spline interpolation — *Lilong Shi, Weihua Xiong, and Brian Funt* — 940

Notes on the application of the standardized residual sum of squares index for the assessment of intra- and inter-observer variability in color-difference experiments — *Manuel Melgosa, Pedro A. García, Luis Gómez-Robledo, Renzo Shamey, David Hinks, Guihua Cui, and M. Ronnier Luo* — 949

Analysis of digital images into energy–angular momentum modes	*Luis Edgar Vicent and Kurt Bernardo Wolf*	808
Diffraction of a Gaussian beam by a logarithmic axicon	*Victor V. Kotlyar, Alexey A. Kovalev, Sergey S. Stafeev, and Victor A. Soifer*	844

Geometric Optics

On the relation between power and astigmatism near an umbilic line	*Jacob Rubinstein*	734
Numerical approach for computing the Jacobian matrix between boundary variable vector and system variable vector for optical systems containing prisms	*Wei Wu and Psang Dain Lin*	747
Damping of the dipole vortex	*Xin Li, Donna M. Pierce, and Henk F. Arnoldus*	778
Multinodal fifth-order optical aberrations of optical systems without rotational symmetry: the astigmatic aberrations	*Kevin P. Thompson*	821

Image Processing

Projection-slice theorem: a compact notation	*Daissy H. Garces, William T. Rhodes, and Nestor M. Peña*	766

Imaging Systems

Development and analysis of a photon-counting three-dimensional imaging laser detection and ranging (LADAR) system	*Min Seok Oh, Hong Jin Kong, Tae Hoon Kim, Sung Eun Jo, Byung Wook Kim, and Dong Jo Park*	759
Error propagation: a comparison of Shack–Hartmann and curvature sensors	*Aglaé N. Kellerer and Albrecht M. Kellerer*	801

Instrumentation, Measurement, and Metrology

Moiré pattern movement compensation and quadrature averaging phase retrieval from time series of speckled arbitrary phase shift interferograms for automatic computation of fundus pulsation curve of the human eye	*André Malz, Ilos Eix, Wilhelm Stork, and Klaus-Dieter Müller-Glaser*	934

Lasers and Laser Optics

Optical trapping of microrods: variation with size and refractive index	*Stephen H. Simpson and Simon Hanna*	850
