CHARACTERIZATION AND ANALYSIS

- Diffraction Studies Across the Length Scales
- Integration of Multiscale Models

DIFFRACTION STUDIES ACROSS THE LENGTH SCALES

- 18:** Diffraction Across the Length Scale: Rozaliya I. Barabash
- 21:** Microscopic Deformation in Individual Grains in an Advanced High-Strength Steel: Zhenzhen Yu, Rozaliya Barabash, Oleg Barabash, Wenjun Liu, and Zhili Feng
- 29:** Acquisition, Sharing, and Processing of Large Data Sets for Strain Imaging: An Example of an Indented Ni₃Al/Mo Composite: N.S. McIntyre, R.I. Barabash, J. Qin, M. Kunz, N. Tamura, and H. Bei
- 35:** *In Situ* Observation of the Dislocation Structure Evolution During a Strain Path Change in Copper: Christian Wejdemann, Henning Friis Poulsen, Ulrich Lienert, and Wolfgang Pantleon
- 44:** The Impact of the Turing Number on Quantitative ASAXS Measurements of Ternary Alloys: Günter Johannes Goerigk
- 54:** Characterization of Magnetoelastic Coupling in Ferromagnetic Shape Memory Alloys Using Neutron Diffraction: Abhijit Pramanick and Xun-Li Wang

- 65:** Application of *In Situ* Neutron Diffraction to Characterize Transient Material Behavior in Welding: Zhenzhen Yu, Zhili Feng, Wan Chuck Woo, and Stan David
- 73:** Characterization of Mineral Ores from Northern and Northwest Pakistan: Yaseen Iqbal, Lii-Cherng Leu, Muhammad Fahad, and Rick Ubc
- 80:** The Effects of an Unexpected Ceramic Coating Phase at the Head of a Pipe on Joining and Postprocessing of a Ceramic-Lined Composite Pipe: R. Mahmoodian, R.G. Rahbari, M. Hamdi, M.A. Hassan, and Mahdi Sparham

INTEGRATION OF MULTISCALE MODELS

- 86:** Stress and Strain Distributions During Compressive Deformation of Titanium Alloy Affected by Microstructure: Qite Zhao, Guoqing Wu, and Wei Sha
- 93:** Influence of Microstructure Representation on Flow Stress and Grain Size Prediction in Through-Process Modeling of AA5182 Sheet Production: Johannes Lohmar, Markus Bambach, and Kai F. Karhausen

- 99:** Multiscale, Multiphysics Numerical Modeling of Fusion Welding with Experimental Characterization and Validation: Mingming Tong, Gregory Duggan, Jun Liu, Yu Xie, Mike Dodge, Lee Aucott, Hongbiao Dong, Ruslan L. Davidchack, Jon Dantzig, Olga Barrera, Alan C.F. Cocks, Hiroto Kitaguchi, Sergio Lozano-Perez, Chuangxin Zhao, Ian Richardson, Anton Kidess, Chris R. Kleijn, Shuwen Wen, Roger Barnett, and David J. Browne

FEATURES

- 7:** Opening the Throttle on Innovation: Lynne Robinson
- 10:** Ten Years and Counting: MS&T'12[®] Builds on Its Record of Success: Lynne Robinson

ALSO IN THIS ISSUE

Member News

- 1:** In the Final Analysis
- 2:** News & Update
- 107:** Meetings Calendar
- 108:** Materials Resource Center: Jobs, Consultants, Marketplace
- 112:** End Notes: "TMS Member Projects Receive First Wave of DMREF Funding"
