### The Back Page

Events

**Front Cover:** Traditional hive at a static apiary at Ciburial Village, Bandung, West Java, Indonesia. The shelter is made of bamboo while the hive itself is made of used sengon (*Albizia chinensis*) wood. The door, covered in guard bees, is at the front of the hive and utilizes strips of car tyres as hinges. It does not have frames and has housed an *A. cerana* colony for about a year and a half.
