

HOT OR NOT?
IBM's Dan Edelstein pokes holes in chips; coal goes green in a German power project; oceans of phytoplankton nibble on carbon.

SPECIAL REPORT: WINNERS & LOSERS 2008

22 WHY LOSERS?

If you want to know why some tech projects succeed and others fail, you can't just look at the winners. That would be like studying cardiovascular health and considering only people with healthy hearts. *By Glenn Zorpette*

24 SOLVING THE OIL EQUATION

A Spanish-American geophysics project searches for Earth's deepest petroleum reservoirs. *By Erico Guizzo*

29 ALGAE BLOOM CLIMATE-CHANGE SCHEME DOOMED

Dumping iron in the ocean may be one way to bury carbon, but it's not a proven way. *By Sandra Upson*

31 THE ULTIMATE DIELECTRIC IS... NOTHING

IBM finishes first in the race to insulate chips with vacuum. *By Sarah Adee*

35 SATELLITE TV SOCCER MOMS WILL HATE

Sirius's Car TV may be great technology, but it will drive parents crazy. *By Tekla S. Perry*

37 MAKE YOUR OWN WORLD WITH OLIVE

Forterra's OLIVE package lets any company set up a "Second Life" kind of world. *By David Kushner*

40 NO PAYOFF FOR GALILEO NAVIGATION SYSTEM

Europe's answer to GPS has missed its

business objectives and needs to be retargeted. *By William Sweet*

42 SPRINT'S BROADBAND GAMBLE

A new network combines the two hottest trends in telecom—broadband and cellular service. *By Steven Cherry*

47 SOCIAL NETWORKING GOES TO THE DOGS

An RFID dog-collar tag will help antisocial neighbors become friends. *By Sandra Upson*

49 RESTORING COAL'S SHEEN

An unusual approach to carbon capture could have big implications. *By William Sweet*

53 STILL WAITING FOR NANOTUBE MEMORY CHIP

Nanterla has conceived a form of carbon nanotube electronics, but when will it deliver? *By Philip E. Ross*

55 YOU TELL US

We leave it to you to give these six items the thumbs up or down. *By Willie D. Jones*
