EASY AS AED:
Engineers foolproofed the defibrillator so that anybody can use it [top left]; Fatima Mansouri [top right] helped link Morocco's power grid with Europe's; the U.S. Marine Corps' Expeditionary Fighting Vehicle [bottom] is expected to take 20 years to field.

COVER STORY
26 WHAT'S WRONG WITH WEAPONS ACQUISITIONS?

Most programs to develop new military systems cost far too much and take way too long. Here's why. *By Robert N. Charette*

34 IDIOTPROOFING THE DEFIBRILLATOR
One of the greatest engineering success stories in medicine is the automation of the defibrillator. *By Mark W. Kroll, Karl Kroll & Byron Gilman*

40 SEEING DOUBLE
Double-patterning lithography is the worst chip-making technique in the world—except for all the others. *By Chris A. Mack*

46 CLOSING THE CIRCUIT
Key improvements to the electrical grids of North Africa will aid the free flow of power all around the Mediterranean. *By Peter Fairley*

UPDATE

- 9 BROADBAND DOWN UNDER**
Australia's building a multibillion-dollar national broadband network. *By Monica Heger*
