THE MAGAZINE OF TECHNOLOGY INSIDERS

1.10

SPECIAL REPORT

winners
& losers

2010

THE YEAR'S BEST AND WORST TECHNOLOGY

- AUTOMOTIVE
- COMPUTING
- ENERGY
- HARDWARE
- MATERIALS
- SOFTWARE

U.S.A. \$3.99
CANADA \$4.99
DISPLAY UNTIL
3 FEBRUARY 2010
SPECTRUM.IEEE.ORG

PIXEL QI'S new display is like three screens in one. 42

WINNERS & LOSERS VII

29 SPECIAL REPORT Again we cast flowers and stones at a wide selection of well- and poorly conceived technology projects, all due for major milestones in the coming year. *By Philip E. Ross*

30 WINNER Computing
Google's Chrome operating system will capitalize on the promise of the netbook. *By Sally Adee*

32 LOSER Automotive
The Chevrolet Volt plug-in hybrid car is imaginative, daring, and superb, but uneconomical. *By Philip E. Ross*

36 WINNER Transportation
IBM helps Russian Railways reinvent the railroad's data infrastructure. *By Sandra Upson*

38 LOSER Computing
D-Wave Systems' quantum computers won't outperform ordinary ones. *By Erico Guizzo*

42 WINNER Computing
Pixel Qi's dual-mode screen provides both e-paper readability and full-color video. *By Joshua J. Romero*

44 LOSER Energy
Cellulosic ethanol—"grassoline"—is an environmental threat rather than a panacea. *By David Schneider*

48 WINNER Lasers
NanoGaN's gallium nitride substrates will help manufacturers make better lasers. *By Richard Stevenson*

50 LOSER Lithography
NanoUV's extreme ultraviolet light source is revolutionary, but that won't entice chipmakers to use it. *By Anne-Marie Corley*

54 WINNER Mobile CPU
Intrinsity's hot-rodged processor gives cellphones PC smarts. *By Mark Anderson*

56 LOSER Security
Airport security screening will go a lot faster with a new biometric system that reads passengers' minds. Sure. *By Steven Cherry & Anne-Marie Corley*

60 You Tell Us
Winners or losers? We leave it up to you to give these six items the thumbs-up or thumbs-down. *By Willie D. Jones*

UPDATE

13 THE TROUBLE WITH CHARGING EVs OVERNIGHT
Utilities foresee local grid problems and regional consequences. *By Peter Fairley*

15 4G IN THE U.S.A.

16 CATFIGHT OVER A CAT BRAIN

17 TAIWAN'S NATIONAL MEMORY

18 A SELF-POWERED BIONIC EYE

18 THE LITTLEST SRAM

20 THE BIG PICTURE
You've got that glow!

OPINION

8 SPECTRAL LINES
Judge not? On the contrary—tech writers are obliged to take a stand. *By Philip E. Ross*

12 FORUM
A reader poses queries to the authors of November's "Organic (But Not Green)," and two iconic computers are proposed as "vectors of change."

27 REFLECTIONS
Engineers created the problem of cellphones, but they can't solve it. *By Robert W. Lucky*

DEPARTMENTS

4 BACK STORY
Google engineers consider their favorite superpower.

6 CONTRIBUTORS

TOOLS & TOYS

22 Electrons are so 20th century. The data cables in your home will soon be optical. *By Mark Anderson*

24 How many watts does your high-definition TV draw? Soon it's going to matter. *By Tekla S. Perry*

23 BOOKS

Does tech make us narcissistic—and would it even matter, if the end of the world were nigh? *By Susan Karlin*

CAREERS

25 Snakes and snails and...cats? A tour through one roboticist's wild kingdom. *By Susan Karlin*

26 Peace in the Middle East is at hand—at least among the engineers. *By Susan Karlin*

68 THE DATA

China produces most of the world's rare earth metals. *By Willie D. Jones*
