### Papers

Molecular relaxation phenomena during accelerated weathering of a polyurethane coating <i>B. M. D. Fernando, Xiaodong Shi, and S. G. Croll</i>	1
Analysis of weathering effects in automotive coatings using thermoluminescence <i>Simone Krüger, K. Brademann-Jock, W. Rauth, T. Klimmasch, and P. Krüger</i>	11
Screening the weathering stability of automotive coatings by chemiluminescence <i>S. Krüger, V. Wachtendorf, W. Rauth, T. Klimmasch, and P. Krüger</i>	17
Hydroxyphenyl-s-triazines: advanced multipurpose UV-absorbers for coatings <i>C. Schaller, D. Rogez, and A. Braig</i>	25
Spray applications: Part V. Influence of high solid compositions on coatings sprayability <i>David M. Mahli, Mark J. Steffenhagen, and J. Edward Glass</i>	33
Implementing DOE to study the effect of paint application parameters, film build, and dehydration temperature on solvent pop <i>Lindita Prendi, Ahammad Ali, Paul Henshaw, Tony Mancina, and Chris Tighe</i>	45
New waterborne acrylic binders for zero VOC paints <i>J. Geurts, J. Bouman, and A. Overbeek</i>	57
Chemical and anticorrosion characterization of polysilsesquioxane coatings catalyzed by different acids <i>Wentao Xing, Bo You, and Limin Wu</i>	65
Synthesis of gold pearlescent pigment via heat treatment of mica <i>A. Mirhabibi, M. Esfidari, and R. Aghababazadeh</i>	73
Aluminum pigments encapsulated by inorganic–organic hybrid coatings and their stability in alkaline aqueous media <i>Li-Jun Li, Pi-Hui Pi, Xiu-Fang Wen, Jiang Cheng, and Zhuo-Ru Yang</i>	77
Relationship between surface chemistry and surface energy of different shape pigment blend coatings <i>Hamad Al-Turaif</i>	85
Effect of vitreous enamel coating on the oxidation behavior of Ti6Al4V and TiAl alloys at high temperatures <i>Yuming Xiong, Shenglong Zhu, Fuhui Wang, and Changhee Lee</i>	93
Thermal failure of thermal barrier coating with thermal sprayed bond coating on titanium alloy <i>Bo He, Fei Li, Hong Zhou, Yongbing Dai, and Baode Sun</i>	99
<b>Brief Communications</b>	
Epoxidized fatty acid-derived oxazoline in thermoset coatings <i>D. L. Trumbo and J. T. Otto</i>	107
Modified low molecular weight acrylics in coating application: synthesis and property evaluation <i>H. A. A. Rasoul, G. W. Rinke, J. P. Wiruth, A. E. Trevino, B. E. Mote, M. A. Langer, and D. L. Trumbo</i>	113
Grafting on nanoparticles: is solid-state NMR a convenient tool of investigation? <i>C. Bonhomme, C. Gervais, S. De Monredon, and C. Coelho</i>	117
Corrosion-protective performance of nano polyaniline/ferrite dispersed alkyd coatings <i>Javed Alam, Ufana Riaz, S. M. Ashraf, and Sharif Ahmad</i>	123
<b>Errata</b>	
Application of marine biotechnology in the production of natural biocides for testing on environmentally innocuous antifouling coatings <i>Emilio Eguía and Alfredo Trueba</i>	129
Studies on corrosion resistant properties of inhibitive primed IPN coating systems in comparison with epoxy-PU systems <i>S. M. Krishnan and P. S. Mohan</i>	131
