## Software helps processors

Fat replacement - healthier meat products

Danish Crown - bringing home the bacon

Contents

8 Automation

RFID technology can automate tracking in processing facilities, boosting food safety measures and efficiency.

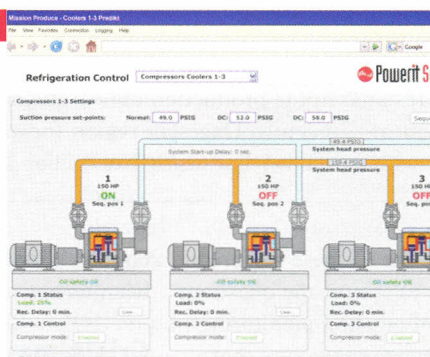

14 Automation

Energy costs are among a food processor's highest operational expense. However, there is now automation software available that allows American processors to manage energy efficiency measures and participation in their local utility's demand response program.

18 Ingredients

Fat replacement is a hot topic in the food industry in Western Europe and also in other parts of the world. Healthy is the key word and that can be further added to, through the reduction of fat in meat products.

23 Slaughtering

The Danes are immensely proud of their pork industry which is a massive export earner for this small Scandinavian country and the Horesens abattoir is the "jewel of the Danish Crown."
