

Volume 8
Number 6
June 2011

Journal of Occupational and Environmental Hygiene

A Joint Publication of ACGIH® and AIHA®

NOW COVERED BY ISI

IN THIS ISSUE

- Development and Evaluation of a Semi-Empirical Two-Zone Dust Exposure Model for a Dusty Construction Trade
- Effect of Exit Spacing in a Multiple-Jet Nozzle on Noise Levels at Audible Frequencies
- Short-Term Monitoring of Formaldehyde: Comparison of Two Direct-Reading Instruments to a Laboratory-Based Method
- Vehicle Design Influences Whole Body Vibration Exposures: Effect of the Location of the Front Axle Relative to the Cab
- Development of Solvent Exposure Index for Construction Painters
- Solvent Substitution: An Analysis of Comprehensive Hazard Screening Indices

A Joint Publication of AIHA®
and ACGIH®

EDITOR IN CHIEF

Mark Nicas, PhD, CIH
mnicas@berkeley.edu

EXECUTIVE COLUMN EDITOR

Leo T. Old, CIH, PE, CHFM
leo.old@stjude.org

PUBLISHERS

Tony Rizzuto, CAE
trizzuto@acgih.org

Peter O'Neil, CAE

MISSION STATEMENT

The *Journal of Occupational and Environmental Hygiene* is published to enhance the knowledge and practice of occupational and environmental hygiene and safety. The journal provides a written medium for the communication of ideas, methods, processes, and research in the areas of occupational, industrial, and environmental hygiene; exposure assessment; engineering controls; occupational and environmental epidemiology, medicine, and toxicology; ergonomics; and other related disciplines.

Development and Evaluation of a Semi-Empirical Two-Zone Dust Exposure Model for a Dusty Construction Trade 337
Rachael M. Jones, Catherine Simmons, and Fred Boelter

Effect of Exit Spacing in a Multiple-Jet Nozzle on Noise Levels at Audible Frequencies 349
Shaw-Ching Sheen

Short-Term Monitoring of Formaldehyde: Comparison of Two Direct-Reading Instruments to a Laboratory-Based Method 357
Deborah V.L. Hirst, Michael G. Gressel, and W. Dana Flanders

Vehicle Design Influences Whole Body Vibration Exposures: Effect of the Location of the Front Axle Relative to the Cab 364
Ryan P. Blood, Patrik W. Rynell, and Peter W. Johnson

Development of Solvent Exposure Index for Construction Painters 375
S.W. Wang, H. Qian, C. Weisel, C. Nwankwo, and N. Fiedler

Solvent Substitution: An Analysis of Comprehensive Hazard Screening Indices 387
M. Debia, D. Bégin, and M. Gérin
